APPENDIX B.

Rules for working detritus tanks, septic tanks, upward flow tanks and sludge digestion tanks in Bengal.

1. **Detritus tanks.**—The object of such tanks is to remove grit and sand from the sewage before it is admitted to the septic or upward flow tanks. Each detritus tank must therefore be emptied and cleaned at frequent intervals.

In cleaning these tanks the supernatent liquid is to be decanted off and pumped into the channel connecting the detritus tanks with the septic tanks or the aerating tanks (activated sludge process), where this has been arranged for. The detritus and sludge from the detritus tanks are to be discharged to the sludge beds or sludge digestion tanks.

2. **Septic tanks.**—The object of the treatment of sewage in a septic tank is the liquifaction of the solid matter and the clarification of the liquid by bacteria which flourish in sewage when air is excluded, as is done by the scum on the surface of the liquid in a septic tank.

During the liquifaction process a certain proportion of the solid matter settles to the bottom of the tank in the form of sludge. As the sludge putrefies, gas is evolved which causes the sludge to rise and mix with the liquid thereby making the effluent black. The blackening of the effluent is a sign that the septic tank requires cleaning, and the period between cleanings varies with the temperature, gassing being greatest in the hot weather and least in the cold weather.

As most of the solid matter is trapped in the first half of a septic tank, the greatest quantity of sludge is formed there, and consequently the first half requires more frequent cleaning than the second half. The change of colour in the effluent must therefore be watched for, and the tank should be emptied and the sludge removed as soon as the change in colour of the effluent becomes apparent.

In cleaning, the supernatent liquid is to be drawn off by the outlet valves provided at different levels. This liquid is to be pumped back into the inlet channel feeding the septic tanks and passed through the second septic tank. The sludge is to be washed out and pumped to the sludge disposal tanks.

Only one septic tank may be cleaned at a time, and the period between cleaning the various septic tanks should be at least seven days otherwise a bad effluent will be obtained.

3. **Upward flow tanks.**—Tanks of this type are chiefly used for sedimentation, sludge from this type of tank is to be removed twice daily by opening the sludge valve and discharging the sludge under hydrostatic pressure. This process takes 10-15 minutes and may be considered as complete as soon as the discharge is seen to consist of liquid only. The sludge discharged is either pumped or run by gravity to the sludge disposal tanks.

Unless upward flow tanks are cleaned of sludge regularly the conical bottom will become filled with sludge which can only be removed at considerable expense by pumping out the whole of the liquid and removing the sludge by hand.

4. **Sludge digestion tanks.**—The function of these tanks is to remove as much as possible of the water in the sludge and to convert the putrescible solid matter into an innocuous substance which can either be disposed of as manure to cultivators or used to raise low lying land.

To effect these changes the sludge is discharged into kutcha tanks made by enclosing a piece of land by an earthen bund. The outlet for the liquid consists of a masonry chamber the top of which is surrounded by a scum board which permits the discharge of water and holds back the floating solid matter. It is essential that the opening round the inside of the scum board should be kept free, and any clogging must be removed periodically. As the contents of the tank solidify the top of the outlet chamber should be raised by brickwork from time to time until the whole of the tank becomes filled with solid digested sludge, after which it may be dug out and sold or a new tank made and the top of the old one covered with earth and planted with crops.

5. **The irrigation area.**—Where there is no means of purifying the septic tank effluent other than land filtration, digestion in tanks, etc. (as at Dacca), the care of the irrigation area and tanks is a matter of great importance.

All irrigation areas are to be regularly cultivated for the purpose of thoroughly oxidising the solid matter deposited on the surface of the soil, thus increasing the capacity of the soil to absorb effluent. This cultivation also keeps down weeds which otherwise quickly get out of hand.

No effluent is to be discharged into any waterway which flows through populous areas unless it is diluted to such an extent as to be harmless.

During the periods at the commencement and the end of the monsoon when the irrigation area is too wet to irrigate, and the flow in the adjoining waterways and drainage channels is too small to permit of adequate dilution, the effluent must be passed through a number of tanks so that digestion and dilution can take place before the effluent is discharged into any drainage channel or other waterway.

During the height of the monsoon all sluices on the disposal tanks are to be opened so as to thoroughly wash out these tanks and to fill them with fresh flood water, where this is possible. This is a matter of great importance, as unless the contents of these tanks are replaced with fresh water from time to time, they will putrefy and cause considerable nuisance to the surrounding locality.

6. **Cleaning of sewers.**—The whole of the sewers in the town should be divided into sections and a regular programme is to be drawn up whereby each section is examined and if necessary cleaned, at frequent intervals.

It will be found that the small branch sewers from dumping depots tend to choke up due to insufficient water being used during dumping operations. The cleaning programme must therefore be drawn up in such a manner as to provide for more frequent inspection and attention to such branch sewers, thus obviating the inconvenience, nuisance and expense of cleaning sewers which have become totally blocked.

All syphons require periodic inspection and attention and if regularly flushed out, particularly at the commencement of the monsoon when large quantities of mineral matter are discharged into the sewers through the gulley pit separators, it will be a comparatively simple matter to maintain them in thorough working order.

The manholes into which house connections discharge should be examined during the monsoon, to ascertain whether such connections have been satisfactorily built in. No house connections should be granted between the months of May and November of each year owing to the difficulty of making watertight connections to the sewers during this period, when the subsoil water level is high.

NOTIFICATION.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

No. 457T.A.I.—21st September 1931.—The following revised rules for the guidance of the Government of Bengal technical scholars in Europe, which supersede those issued under this department notification No. 3769Ind., dated the 24th August 1926, are published for general information:—

Rules for the guidance of the Government of Bengal Technical Scholars under the Supervision of the High Commissioner.

1. Every scholar will be required to forward to the Secretary to the High Commissioner for India (Education Department), India House, Aldwych, London, W. C. 2, ordinarily at least one month before the date of departure from India, the sum of £40 for initial expenses on arrival in the United Kingdom. A scholar will have no claim to the payment of any instalment of his scholarship unless this deposit has been made. The deposit is held at the disposal of the scholar and may be reclaimed as soon as he reaches England to meet expenses of the purchase of clothes or other necessary equipment, but a scholar is advised to leave at least £10 on deposit to be available for emergencies or other expenses not covered by the conditions of the scholarship.

2. A scholar will be provided with a passage from India to the place of study in the United Kingdom, and, as a general rule, is required to travel by the all-sea route from India to England unless he himself elects to pay the cost of the overland journey from Marseilles to London, in which case he may apply for payment of the overland allowance as fixed from time to time by the High Commissioner. The full cost of the overland journey (rail and baggage expenses) shall in no case be refunded to a scholar unless he has been provided by the Government concerned with a steamer ticket to Marseilles and has been expressly instructed to travel overland.

3. Every scholar on reaching England must report himself to the Office of the High Commissioner for India (Education Department), India House, Aldwych, London, W. C. 2, and sign the undertaking referred to in Rule 6. He will be required to furnish his private address and to notify immediately any changes thereafter.

4. Accommodation for new arrivals (men only) is provided at 21, Cromwell Road, South Kensington, London, S. W. 7. A scholar who wishes accommodation to be reserved should write to the Warden, 21, Cromwell Road, S. W. 7, or should cable in good time the exact date of his arrival from Marseilles. Every scholar will be required, whenever possible, to reside in the hostel of the University or College where he is pursuing his course, though in special cases the High Commissioner will be prepared to consider applications for permission to live in private lodgings.

5. Every scholar pursuing courses of study or training in the United Kingdom, in Europe or in the United States of America is under the direct charge of the Secretary to the High Commissioner for India (Education Department), with the exception of those at Edinburgh, Cambridge, Glasgow, Manchester, and Oxford, who must follow the instructions given through the following officers, hereinafter referred to as Local Advisers:—

Edinburgh—The University Adviser to Indian Students, Department of Chemistry, The University, King's Buildings, Edinburgh.

Cambridge—The Secretary, Inter-Collegiate Indian Students' Committee, 22, Fitzwilliam Street, Cambridge.

Glasgow—The Local Adviser to Indian Students, The University, Glasgow.

Manchester—The Local Adviser to Indian Students, College of Technology, Manchester.

Oxford—The Secretary, Delegacy for Oriental Students, Indian Institute, Oxford.

All communications regarding courses of studies or training, payment of fees or other matter connected with the scholarship must be addressed, either to the Secretary to the High Commissioner for India (Education Department) or in the case of scholars at Edinburgh, Cambridge, Glasgow, Manchester, or Oxford to the Local Adviser concerned. Scholars are not permitted to communicate direct with their Provincial Government in India in any matter affecting their scholarship.

6. Every scholar will be expected to consult the Secretary to the High Commissioner (Education Department) or his Local Adviser regularly in regard to his course of study or training. He must submit, either direct or through his Local Adviser, within one month after the beginning of his University, College or other training, a statement for the approval of the High Commissioner showing the exact course which he is pursuing. The High Commissioner will prescribe the course of study or training considered necessary to fulfill the purpose for which the scholarship has been awarded, and every scholar must obey all instructions regarding his course of study or training which he may receive either direct from the Secretary to the High Commissioner (Education Department) or from his Local Adviser. The course of study which has received the sanction of the High Commissioner may not be changed without his approval, and no additional course or subject of study or training may be undertaken without his prior sanction. A scholar will not be permitted, without the previous sanction of the High Commissioner, to enter for any examination not forming a normal portion of his sanctioned course. He will be required to give a written undertaking that he will at once and without discussion of possible alternatives devote himself exclusively to the course of study and training prescribed for him and that he will not delay or neglect his prescribed course in anticipation of orders regarding possible alternatives.

7. A scholar sent to this country for training in technical or industrial subjects will be required to undergo practical training under such conditions as may be prescribed by the High Commissioner. Whilst undergoing practical training, the scholar must keep, in a book supplied by the Education Department of the Office of the High Commissioner, a concise diary of his work. This diary, endorsed by the authorities under whom the scholar is working, must be submitted at the prescribed date to the Secretary to the High Commissioner (Education Department), either direct or through the Local Adviser concerned.

8. A scholar undergoing practical training in works or in such professional subjects as Veterinary, Medicine, etc., will be entitled to three weeks' leave each year and must obtain the approval of the authorities under whom he is working and of the High Commissioner to the exact dates on which he proposes to take such leave. He must also submit at least two months in advance a full statement of his proposals for practical training during the vacations. A scholar attending university or college courses who proposes to spend his vacations on the Continent must submit his plans for the approval of the High Commissioner not less than one month before the beginning of the vacation.

9. In the absence of any special instructions from the Government concerned, scholarship allowance will be payable from the date on which the scholar reports his arrival at the Office of the High Commissioner until the expiration of the full period for which it has been granted or extended or to such earlier date that the High Commissioner may determine having regard to the date at which the sanctioned course of study or training has been completed. Scholarship allowance will not be paid beyond the date of the sailing from London of the steamer on which the passage has been booked, except as provided in Rule 21.

10. Subject to a due compliance with the Rules, each scholar will be paid his annual stipend quarterly in advance.* A first instalment to cover a full quarter will be paid as soon as possible after the scholar has arrived and has signed the necessary declaration on the prescribed form. Three months after the date of arrival the amount to the ensuing official Quarter Day† will be paid to the scholar either direct or through the Local Adviser. Subsequent payments will be made in advance, on or after each official Quarter Day. It should, however, be understood that the High Commissioner (or the Local Adviser on his instructions) has full discretion to disburse the annual allowance of any scholar in such instalments as he may consider desirable.

11. Each scholar must submit, not less than 14 days before the date on which his scholarship instalment falls due, an application on a prescribed form endorsed with a certificate of satisfactory conduct and progress from the University, College or Works authority.

He will also be required to furnish annually on a prescribed form, copies of which will be supplied, a full statement of the course of study or training which he has pursued during each year ending 30th September. The instalment of scholarship allowance due on 1st October of each year will not as a general rule be issued until this annual report has been received. It should, however, be noted that the High Commissioner at his discretion may require a report on a scholar's work or conduct at any time.

12. The allowance of a scholar in receipt of wages whilst undergoing practical training will be reduced by a corresponding amount.

13. Advances on the quarterly instalments of scholarship allowance will not as a general rule be granted, except in respect of (*a*) caution money payable to Universities or Colleges, and

(b) purchase of expensive instruments essential for the scholar's sanctioned course of study or training. Any advances thus sanctioned will be recoverable from the quarterly instalments of scholarship spread over a total period not exceeding one year.

14. The special attention of every scholar is drawn to the fact that no claim for payment of any expenditure whatsoever can be admitted unless the scholar has obtained previous sanction from the High Commissioner.

15. Scholars at Oxford and Cambridge will be required to meet from their scholarship allowance all their expenses, including university or college fees, except journeys to and from his place of study on arrival from India and on departure to India. A Language Scholar at Oxford or Cambridge (*i.e.*, a scholar pursuing research in Arabic, Persian, or Sanskrit) may, however, be granted travelling expenses from place of study, when going abroad, where such visits are certified as *essential* to his studies by the professor concerned and are sanctioned by the High Commissioner.

16. For scholars (other than those at Oxford or Cambridge), charges for university and college fees, including membership of the Student Union or equivalent society, premium for practical training facilities and the necessary travelling expenses of scholars by second class, or by third class if no second be available, shall, if sanctioned in advance, be defrayed by the High Commissioner. A scholar undergoing professional or technical training may be required at the discretion of the High Commissioner to join the appropriate society or institution, in which case his entrance fees and annual subscriptions will be defrayed by the High Commissioner. A sanctioned premium and university or college terminal or sessional fees will be paid direct to the university, college, or firm concerned by the High Commissioner. Examination fees and subscriptions, etc., to other institutions, where such have been sanctioned by the High Commissioner, will be paid by the scholar himself in the first place and refunded to him on production of the necessary voucher.

*See Schedule at end of Rules.

†The official Quarter Days are 1st January, 1st April, 1st July, 1st October.

17. A scholar who proposes to undertake journeys or tours for the purpose of his course of study or training must submit an application either direct or through his Local Adviser at least 14 days before the date of the proposed visit. The application must be supported by a certificate or recommendation from the professor or head of department under whom the scholar is working that the journey is necessary for the purpose of his work. [*If the proposed visit or tour and estimate of expenses is approved by the High Commissioner, third-class travelling expenses (second-class on the Continent) will be paid to the scholar on receipt of the claim on the appropriate form, supported by the necessary vouchers, together with halting allowance at the rate authorised, unless otherwise laid down when the journey is sanctioned.]

18. Charges for private tuition, unless specially sanctioned in advance, books, instruments, and medical attendance must be paid by the scholar himself.

19. Unless the conditions under which the scholarship was awarded preclude any extension, a scholar who wishes to apply for the extension of his scholarship must submit an application to the Secretary to the High Commissioner (Education Department), either direct or through the Local Adviser, not less than six months prior to the expiration of the term of tenure. This application should state definitely the purpose for which the extension is desired and should be supported by the recommendations of the university or other authority under whom the scholar is pursuing his course of study or training.

20. A scholarship may be terminated at any time within the discretion of the High Commissioner—

(a) if the scholar's work and progress be considered unsatisfactory,

(b) if his conduct prove unsatisfactory, or

(c) if he fail in health,

in which cases, unless the High Commissioner sees reason to the contrary, the scholar will retain his right to a passage to India, provided he returns when instructed by the High Commissioner. Any scholar failing to return to India when instructed to do so by the High Commissioner will forfeit his right to a free passage.

A scholar who resigns his scholarship before the expiration of its tenure for reasons which, in the opinion of the High Commissioner, are not satisfactory, will be held to resign his claim to a return passage to India.

21. A scholar will be entitled to a return passage from the place of study to India. The arrangements for the voyage will be made by the Office of the High Commissioner and a scholar is not entitled to make his own passage arrangements or to claim an allowance in lieu of a provided passage. At least three months before the termination of his course of study or training the scholar must submit to the Secretary to the High Commissioner (Education Department), either direct or through the Local Adviser, an application for a return passage. The scholar will normally be required to embark from a port in the United Kingdom, but he may be allowed at the discretion of the High Commissioner to join the steamer at Marseilles and will then be paid the overland allowance as fixed from time to time by the High Commissioner. If a scholar is definitely instructed by the High Commissioner to join the steamer at Marseilles, he will be allowed second-class travelling expenses from London to Marseilles and his scholarship allowance will be payable to the date of embarkation from Marseilles (unless it has already expired or been terminated). Travelling expenses in India will not be payable by the High Commissioner.

22. A scholar who desires to defer his return to India after the expiry or termination of his scholarship will, unless the Government concerned desire his return, be allowed to do so

provided that the High Commissioner approves the purpose of the deferment and is satisfied that the scholar is in a postion to maintain himself during the whole period of the proposed deferment.

23. Each scholar will be given a grant of £5 to meet incidental expenses during the voyage to India. This allowance will not be payable to officers in Government employ who are temporarily holding a scholarship, but whose official pay commences on the termination of the scholarship, nor will it be applicable to the case of a scholar returning to India on appointment to a Government post which entitles him to an advance of pay.

24. A scholar who intends to marry during the tenure of his scholarship must so inform the High Commissioner, who, in consultation with the Local Government concerned, may terminate or suspend the scholarship if he thinks fit in the special circumstances of the case.

NOTE.—In all the above Rules the masculine (he, him) must be understood to include the feminine (she, her).

L. R. FAWCUS,

Secy. to the Govt. of Bengal.

DARJEELING, THE 28TH SEPTEMBER 1931.

RESOLUTION—No. 506T.A.I.

Minister-in-charge: The Hon'ble Mr. Bijoy Prasad Singh Roy.

Under the existing system, the Collectors of districts exercise the power of deciding the number and location of excise licenses in districts subject to revision by the Commissioner of Excise under legal provisions contained in sections 30 to 35 of the Bengal Excise Act, 1909 (V of 1909). In the exercise of this power, the Collectors are assisted by the advice of Local Advisory Committees, but these committees do not possess any statutory powers of decision on the number or location of licenses, or any power of inspection of licensed premises, which are vested in Licensing Boards, which can be constituted by the local Government under clause (*b*) of sub-section (*2*) of section 7 of the Bengal Excise Act.

Such boards have already been constituted for the district of Calcutta and, as an experimental measure, for the four districts of 24-Parganas, Dacca, Rangpur and Chittagong. As the boards in the four mufassal districts mentioned above. have been working adequately, it has been decided by Government to extend the Licensing Board system in the remaining districts in Bengal, except the district of Darjeeling, with similar constitution and statutory powers as those of the existing boards as an experimental measure for the period from 1st October 1931 to 31st March 1933. In the Asansol subdivision of the district of Burdwan and in the district of Jalpaiguri special constitutions have been made owing to the existence of the mining and tea industries respectively requiring special consideration. Necessary notifications regarding the constitution and functions of these boards have been published in the *Calcutta Gazette*.

ORDER.—Ordered that the above resolution be published in the *Calcutta Gazette* and communicated to the Commissioner of Excise and Salt, and to all Commissioners of Divisions for information and communication to the District Officers concerned.

By order of the Government of Bengal (Ministry of Excise),

L. R. FAWCUS,

Secy. to the Govt. of Bengal.

Now, therefore, in exercise of the power conferred by sub-section (*1*) of section 39 of the same Act, I hereby cancel the registration of the said society.

And further, in exercise of the power conferred by sub-section (*1*) of section 42 of the same Act, I hereby appoint the Auditor in charge of liquidated societies, Rangpur, to be liquidator of the said society.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominee predecease them after five years of admission. The second quinquennial valuation of the Fund has been completed by the actuary to the Government of India, and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Bengal, Imperial Secretariat Buildings, Calcutta.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 28th September 1931.

Preliminary Forecast of the Bhadoi crops of Bengal, 1931-32.

(NOTE.—On an average of the five years ending 1929-30, the area under autumn rice in Bengal has represented some 6·1 per cent. of the total area under rice in British India.)

Character of the season.—At the outset the rainfall in February and March was generally favourable for the preparatory tillage. During the following month the rainfall was generally defective and the sowings continued slowly, but good rain in May facilitated the operation, and in consequence more area has been brought under cultivation this year. The rainfall during June and July proved generally favourable for the growth and development of the crops. Towards the end of July the river Brahmaputra came down in unprecedentedly high floods, but fortunately the major portion of the autumn rice was reaped. Considerable damage was done in the water-logged tracts of East and North Bengal. With this exception, the season has been a satisfactory one.

Acreage.—The total acreage sown with the different *bhadoi* crops this year is reported to be 6,887,700 acres as against 5,830,000 and 5,837,700 acres, respectively, in the corresponding and final forecasts of last year. Of this, the area under *autumn* rice is estimated at 6,138,800 acres as against 5,067,300 and 5,082,100 acres, respectively, in the corresponding and final forecasts of last year. The increase in area this year is attributed mainly to the decreased cultivation of jute.

Outturn.—According to District Officers' estimates, the outturn of the different *bhadoi* crops for the Presidency works out at 81 per cent. of the normal this year as against 80 and 81 per cent., respectively, in the corresponding and final forecasts of last year.

The *autumn* rice is estimated to yield an outturn of 80 per cent. of the normal for the Province this year as against 105 per cent. estimated both in the corresponding and final forecasts of last year. In my opinion the outturn of autumn rice is an underestimate and the crop will not fall short of 90 per cent. of the normal this year.

Director of Agriculture, Bengal.

Murshidabad.	*Bhadoi* paddy (autumn rice).	287,400	212,000	236,800	75	83	By the end of May. Late.	The increase in area in some cases is due to decrease in area under jute. The weather has been favourable in Lalbagh and Sadar but not so in Kandi and Jangipur. The outturn is anticipated to fall below the normal owing to late sowing, to untimely rain and to damage caused by flood in Lalbagh and Jangipur subdivisions.

Bogra.	*Bhadoi* paddy (autumn rice).	110,900	110,000	124,500	70	40		The increase in area in some cases is due to decrease in area under jute cultivation. The weather was not favourable at the beginning but later on till the end of July the rainfall was favourable. At the end of July there was high flood causing considerable damage in East Bogra even to the extent of ten annas so the average outturn is low. On the whole the weather for other crops is fair.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 28th September 1931.

First Forecast of the Winter Rice Crop of Bengal, 1931-32.

(NOTE.—On an average of the five years ending 1929-30, the area under winter rice in Bengal has represented some 17·5 per cent. of the total area under rice in British India.)

Character of the season.—Ante-monsoon showers, although generally defective in March and April, were sufficient for the preparatory tillage and for the sowings of the broadcast paddy. Sowings of winter paddy in nurseries were carried on under favourable circumstances. Good rainfall in July favoured the transplantation of winter paddy seedlings, except in parts of West Bengal, where more rain was needed for the operation. In the end of July the river Brahmaputra came down in unprecedentedly high flood and an appreciable amount of *aman* paddy was destroyed; also transplanting operations were hindered in the districts affected; elsewhere the progress was satisfactory. Rainfall during the month of August, which was generally moderate to heavy, facilitated further transplantation, with the result that more area was brought under cultivation this year. On the whole, the crop is expected to be satisfactory.

Acreage.—According to the figures returned by the District Officers the total area under winter rice is 15,500,800 acres as compared with 14,768,300 and 15,120,300 acres in the corresponding and final forecasts of last year.

Outturn.—From the summary of the district returns appended it will be seen that six districts expect a normal crop, nineteen districts report a crop varying from 75 to 92 and only two districts below 70 per cent. of the normal.

According to the above estimates the provincial outturn works up to 85 per cent. as against 100 per cent. of the normal estimated both in the first and final forecasts of last year. In my opinion the present prospects indicate not less than 90 per cent. of the normal.

Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 5th October 1931.

Second Forecast of the Cotton Crops of Bengal, 1931-32.

(NOTE.—On an average of the five years ending 1929-30, the area under the cotton crops in Bengal has represented some 0.2 per cent. of the total area under cotton in India.)

There are two crops, early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the season.—As indicated in the first forecast, the weather was not favourable both at the time of sowing and during the period of germination. Subsequent conditions were, however, favourable for the growth of the early crop in Bankura and the Tripura State. On the whole, a fair crop is expected for the province.

Sowings of late variety commenced in Midnapore under fair conditions.

Area sown.—The area sown with early cotton is reported to be 74,327 acres this year, as against 76,207 acres in the corresponding forecast of last year. Of the late crop an area of 455 acres is reported to have been sown this year in Midnapore, as against 505 acres reported in the corresponding forecast of last year. The decrease in area under early crop in the Tripura State is attributed to the depression in the market.

Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 6th October 1931.

(Second Forecast of the Sugarcane Crop of Bengal, 1931-32.)

(NOTE.—On an average of the five years ending 1929-30, the area under sugarcane in Bengal has represented some 7·1 per cent. of the total area under sugarcane in British India.)

Character of the season.—As stated in the first forecast the weather was generally favourable during the time of planting and germination of the crop. Subsequent conditions have proved beneficial for the growth except in some East and North Bengal districts, where heavy rain and flood in the end of July have done considerable damage. The season, on the whole, has been a favourable one for the crop this year.

Area planted.—The total area planted with the crop for the province is reported to be 228,800 acres this year as against 196,400 and 198,500 acres reported, respectively, in the corresponding and final forecasts of last year. The increase in area is attributed to the decreased cultivation of jute.

Outturn.—According to the estimates of District Officers, the average outturn of the crop for the province this year works out at 88 per cent. of the normal against 87 and 92 per cent., respectively, in the corresponding and final forecasts of last year.

Condition figure.—The condition figure for the cane crop is estimated at 88 per cent. as against a ten years' average of 81·6 per cent. This means that the condition of this year's crop is equal to about 108 per cent. of the ten years' average.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominee predecease them after five years of admission. The second quinquennial valuation of the Fund has been completed by the actuary to the Government of India, and his report discloses very favourable results. For forms of application and rules of the Fund apply to the Accountant-General, Bengal, Imperial Secretariat Buildings, Calcutta.

GOVERNMENT OF BENGAL.

NOTIFICATION.

No. 3050L.- 31st October, 1931.—The following report of the Select Committee on the Bengal Patni Sale Law (Amendment) Bill, 1931, by Babu Kishori Mohan Chaudhuri, M.L.C., with the Bill as amended by the Committee, is hereby published for general information :—

Report of the Select Committee on the Bengal Patni Sale Law (Amendment) Bill, 1931.

We, the members of the Select Committee of the Bengal Legislative Council to which the Bengal Patni Sale Law (Amendment) Bill, 1931, was referred by a motion carried in the Bengal Legislative Council on the 24th July, 1931, have the honour to submit this our report with a copy of the Bill, as amended by us annexed. All matter omitted by the Committee has been printed in italics and enclosed in square brackets, and all new matter inserted has been underlined.

1. The Bill was published in English in the *Calcutta Gazette* on the 13th August 1931.
2. The Committee met on the 6th August and completed the consideration of the Bill.
3. We consider that the Bill has been so altered as to require republication.
4. We recommend that the Bill as amended be passed by the Council.
5. The following are the principal changes made in the Bill :—

Title and Preamble.—The title has been corrected to correspond with the title of the Regulation amended by the Bill. Certain unnecessary words have been omitted from the preamble.

Clause 2.—It was admitted by the Member in charge of the Bill that the clause as drafted did not adequately convey his intentions. The clause was accordingly redrafted in harmony with the Regulation, and provision was made for cases in which the taluk had been resold under the provisions of section 8 of the Regulation. Sub-clause third was added to safeguard the interests of Government, and sub-clause fourth was inserted to debar a person who has had recourse to the Civil Courts from simultaneously seeking the same relief under the new provision now to be inserted in the Regulation.

Sub-section (2) of the new section 14A proposed by the Bill did not meet with the approval of the Committee and has been omitted.

Clause 3.—The clause has been redrafted to correspond with the provisions of clause 2 as now redrafted by the Committee.

Joint minute of dissent by the Hon'ble Sir Provash Chunder Mitter, Kt., C.I.E., and Mr. H. C. V. Philpot.

The member-in-charge (Babu Kishori Mohan Chaudhuri) admitted that the Bill was unsatisfactory and it has been entirely remodelled in Committee. Although an attempt has been made to remedy it in the short time available, it is considered that there is some danger in tampering with this old Regulation which is a complicated one and was specially framed in consideration of the peculiar nature of the *patni* tenure, and of its object of securing punctual payment of rent to the *zamindar* in return for the concessions made by the *zamindar*. Further, it forms the basis of all the contracts subsequently made. The result of importing into the Regulation provisions similar to those of the ordinary civil law as regards setting aside sales cannot be foreseen. It is by no means sure that there will not be an increase in litigation in consequence. For instance, when the question arises whether a particular person is entitled to set aside the sale under clause 2 of the proposed Bill, though the Collector will decide it summarily, it may lead to litigation in the civil court. There is also the risk that in some cases *patni* taluks will be sold for less than their real value if the introduction of the element of uncertainty into the sales tends to discourage *bona fide* purchasers and encourage a class of merely speculative bidders. Subject to certain safeguards we think there would be no objection to giving relief to *patnidars* whose tenures are sold under the Regulation by enabling them to set aside the sale on payment of compensation, but in a matter like this it is best that the legislation should be undertaken by Government after consulting the public and especially the interested parties and the officials who have to administer the Regulation. It would also have to be considered whether it might not be more satisfactory to give the power of setting aside the sale on payment of compensation to the civil court. This might minimise the chances of further litigation, relieve the Collector of the onus of deciding questions which may sometimes be complicated and bring the matter into line with the procedure in the Bengal Tenancy Act, 1885, and the Code of Civil Procedure, 1908. Further, if that were done, it might be possible to give relief to other persons whose interests are really affected by the sale. For the reasons given above we regret that we are unable to accept the Bill as drafted, but we are prepared to recommend that Government should themselves undertake legislation to introduce the principle of giving relief to *patnidars* whose *taluks* are sold under the Regulation subject to such safeguards as may be found desirable.

Minute of dissent by Mr. Jatindra Nath Basu, M.L.C.

In order that subordinate tenure-holders may be duly safeguarded, I am of opinion that in the proposed new section 14A the words " It shall be competent for any person either owning property or holding an interest therein by virtue of a title acquired before such sale " should be substituted for the words " It shall be competent to the defaulting *talukdar* or the defaulting holder of a tenure saleable under this Regulation or any *talukdar* of the second degree."

Minute of dissent by Rajâ Bhupendra Narayan Sinha Bahadur, of Nashipur, M.L.C.

I sign the report of the Select Committee of the Bengal Patni Sale Law (Amendment) Bill, 1931, subject to the following note of dissent :—

The Bengal Patni Sale Law (Amendment) Bill while making better provision for the *patnidars* and others having an interest in the tenure in case of sale of *patni* for arrears of rent, has not made adequate provision for the protection of interest of the *zamindars* or superior landlords.

In clause 2 of the Amendment Bill relating to proposed section 14A of the Regulation regarding the deposit with the Collector to set aside sale, it is desirable that only the recorded *patnidar*, or recorded *talukdar* of the second degree, or the recorded defaulting holder of a tenure saleable under this Regulation should be entitled to deposit. The reason for this proposal is a very plain one. If there be no provision for this registration of the name of such *talukdar*, or of the defaulting holder of a tenure; or any *talukdar* of the second degree, it will practically be difficult, or rather impossible for the Collector to ascertain whether they are the *bona fide patnidars* or *darpatnidars* when the application will be submitted to set aside the sale. To ascertain the identity of such person, probably a fresh issue will be involved, and it will take a long course to decide it at the cost of the purchaser and *zamindar*. Moreover, the benefit conferred on the landlord in this connection is evident from section 6 of the Regulation.

Thus it is desirable that only the registered *talukdar*, or the registered defaulting holder of a tenure saleable under this Regulation, or any registered *talukdar* of the second degree should be entitled to deposit. The privilege will only be granted in the case of registered *patnidars* or *talukdars* of the second degree and to no other persons who have not registered their names in the *sherista* of the superior landlords.

A new clause (*d*) should be added to the above section 14A, namely, about the disposal of balance, if any, after meeting the charges mentioned in clauses (*a*), (*b*) and (*c*), or in cases where the sale be not set aside, the balance of money, if any, after payment of the charges under the

proposed clauses (*a*) and (*b*). This balance of money should be allowed to meet any rents which have been in arrears, or which may have fallen due to the *zamindar* or to the superior landlord in respect of the *patni* before the date of application for sale, or between the date of sale and date of confirmation of sale. This is similar to the provision made in section 26, clause (*c*) of the Bengal Public Demands Recovery Act, 1913; and section 169, clause, (*c*) of the Bengal Tenancy Act, 1885. The proposed section of the *patni* law stands on the same footing as any other rent law in force, specially in the matter of procedure for recovery of rent.

In section 14A, clause (*b*), regarding amount of deposit to set aside the sale, it is desirable that such amount should bear interest at the rate of 12½ *per cent.*, calculated from the date of sale to the date when deposit is made; otherwise, there will be a hardship on the *zamindars*. This the *zamindars* can reasonably demand.

NOTIFICATION.

No. 3055L.—2nd November, 1931.—The following report of the Select Committee on the Bengal Agricultural and Sanitary Improvement (Amendment) Bill, 1931, by Maulvi Abdul Hakim, M.L.C., with the Bill as amended by the Committee, is hereby published for general information.

REPORT OF THE SELECT COMMITTEE ON THE BENGAL AGRICULTURAL AND SANITARY IMPROVEMENT (AMENDMENT) BILL, 1931.

(By Maulvi Abdul Hakim, M.L.C.)

We, the members of the Select Committee of the Bengal Legislative Council, to which the Bengal Agricultural and Sanitary Improvement (Amendment) Bill, 1931, by Maulvi Abdul Hakim, M.L.C., was referred by a motion carried in the Bengal Legislative Council on the 23rd July, 1931, have the honour to submit this our report with a copy of the Bill, as amended by us annexed. All matter omitted by the Select Committee has been printed in italics and enclosed in square brackets, and new matter inserted has been underlined.

1. The Bill was published in English in the *Calcutta Gazette* on the 12th March, 1931.

2. We consider that the Bill has not been so altered as to require republication.

3. The principal changes made in the Bill are detailed below :—

Clause 1.—Sub-clause (*2*) in regard to the date of commencement of the proposed Act has been omitted, as being unnecessary.

Clause 2 (*i*) of the Bill as altered by the Select Committee reproduces clause 2 of the Bill as introduced.

Clause 2 (*ii*) (*a*).—The words "in any case" in sub-section (*2*) of section 15 were dependent on sub-section (*1*) of that section, and owing to the deletion of that sub-section are inappropriate, and have therefore been omitted.

Clause 2 (*ii*) (*b*).—The majority of us consider it advisable to enable the local authority or person concerned to give security for the cost of the work in lieu of an advance.

Clause 2 (*iii*).—The object of the proposed sub-section (*3*) in section 15 of the Act is to remedy the legal objection that District Boards have no power under the Bengal Local Self-Government Act of 1885 to take loans or make advances for schemes of agricultural improvement under the Bengal Agricultural and Sanitary Improvement Act, 1920.

Note of Dissent by Maulvi Abdul Hakim, M.L.C.

I sign the report with a minute of dissent regarding the words which are proposed to be added at the end of sub-section (2) of section 15 of the Act. The reason for my dissent is that even in that case question may be raised by Collectors regarding the inadequateness of the security of the cost. And if the Collector is really unwilling to undertake such work, he will take the plea that the security is not sufficient in consequence of which the same obstacle may again appear in the way of performance of any work under this Act.

The very fact that public bodies have supported my amendment and almost all the Collectors have not supported my amendment undoubtedly shows that Collectors are not generally inclined to undertake any work under this Act for the reasons best known to them. If the proposed words are added, it will be easy for Collectors to raise the plea that the security is not sufficient and in that case the same difficulty will again arise and thus all the proceedings for the work may be stayed as before. Practically no works have been done in Bengal since the passing of the Act, because of the obstacle that exists in the original section. If the cost of the work or any portion thereof is advanced *in cash* by any person or by any authority, the Collector shall not be able to raise any excuse for not undertaking the work. I, therefore, think it proper that the proposed words should not be added at the end of sub-section (2) of the section.

Note of Dissent by Dr. Naresh Chandra Sen Gupta, M.L.C.

I regret that I was not able to attend meetings of the Select Committee owing to illness, and had not the advantage of discussing matters with the members.

I am afraid that the amendments made defeat the entire purpose of the Bill and would make it nugatory. I doubt whether it was within the province of the Select Committee to make such amendments.

In my opinion, the necessity of prepayment or even the giving of security should be dispensed with. If a project is found on examination to be beneficent and if the authorities are satisfied that it would be possible to realise the costs under section 18, it would be needlessly hampering the work to ask for payment or security in advance. If on the contrary the authorities are not so satisfied, they would certainly not authorise the taking in hand of the project.

THE BENGAL AGRICULTURAL AND SANITARY IMPROVEMENT (AMENDMENT) BILL, 1931.

CALCUTTA, THE 29TH OCTOBER 1931.

RESOLUTION—No. 6476AGRI.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

Read—

The report on the operations of the Department of Agriculture, Bengal, for the year 1930-31.

Administration.—Mr. Finlow held charge of the department during the year under report while Mr. McLean continued to hold charge of the office of Assistant Director throughout the year. Major Carbery, the

Agricultural Chemist, was on leave from the 24th April to 27th October 1930, and Babu Goshthabihari Pal, Assistant Agricultural Chemist, held charge of the office of Agricultural Chemist during the period. Mr. Smith, Deputy Director of Agriculture, Eastern Circle, and Mr. Gossip, the Live-stock Expert, went on leave in March 1931. The former was succeeded by Rai Sahib Jamini Kumar Biswas and the latter by Rai Sahib Kalidas Rai, Superintendents of Agriculture. The Bengal Higher Agricultural Service was created with effect from the 1st May 1930, the vacant posts of Deputy Director of Agriculture, Western and Northern Circles, and Second Economic Botanist borne on the cadre of the Indian Agricultural Service being included in the cadre of that service. Messrs. J. N. Sarkar, A. R. Malik and D. Datta, holders of the respective charges, were appointed to officiate in the Higher Provincial Service from the same date.

2. **General remarks.**—Although the season was on the whole satisfactory for winter crops and fairly favourable for autumn and spring crops, the world-wide trade depression was reflected by a contraction in the demand for jute, a record crop of which was followed by an abnormal fall in prices. This attended by the low prices of rice seriously affected the economic condition of the agricultural population and resulted in widespread distress. Floods in Bogra and Pabna districts also caused local distress necessitating the adoption of relief measures. The situation engaged the serious attention of the Government as well as of the public. Various suggestions for tackling the situation were made but they had to be rejected as impracticable. Government, however, decided to carry on an intensive propaganda in the rural areas for the restriction of jute cultivation and leaflets were distributed through the agency of the local officers, Presidents of panchayats and of union boards, etc., and other public institutions interested in the matter. The estimated area under jute in 1931 was 1,613,700 acres against 3,062,300 acres in 1930 while the total outturn of the crop is estimated at 5,002,700 bales of 400 lbs. as compared with 9,966,000 bales last year. The trade depression, however, continued and there has been little indication up to the present of improvement in the situation since the close of the year.

Owing to these untoward circumstances there was a serious financial stringency which unfortunately led to a curtailment of expenditure and consequent restriction in the activities of the departments of Government.

3. While there was a set back in the activities of the Agriculture Department in its various branches, it is gratifying to note that grants from the Imperial Council of Agricultural Research helped a great way towards the initiation of long pending schemes of agricultural research.

During the year under report the Imperial Council sanctioned grants for six schemes, viz., (1) for collecting the data on manurial experiments conducted in the province in the past; (2) for experimental work on sugarcane-crushing and *gur*-boiling plants for three years; (3) for the establishment of a sugarcane seedling testing station at Dacca spread over five years; (4) for the appointment of a Physical Assistant on the staff of the Agricultural Chemist for five years for enabling the department to collaborate with the Dacca University in the soil work for which the Council had given a grant to the University; (5) for the appointment of a Physiological Chemist to investigate the problems of animal nutrition for five years; and (6) for research into paddy in this Presidency involving a capital non-recurring expenditure of Rs. 75,000 and recurring expenditure of Rs. 1,47,272 for a term of five years. Grants for the two last named schemes were not available during the year under report. There are a number of agricultural schemes recommended by the Provincial Research Committee which are awaiting consideration by the Imperial Council.

4. **Research and Experiment.**—Research and experiment continued to be carried on as usual in the Fibres, Botanical and Chemical Sections at the Dacca Farm. As stated in paragraph 3 above grants from the Imperial Council of Agricultural Research gave a fillip to research work; and it is hoped that the successful conclusion of the research work and the close collaboration in this direction with the Universities of Dacca and Calcutta will be fraught with far-reaching results. The visual results of the experiments are the establishment of superior and high-yielding races of departmental jute, paddy and sugarcane. An increase in the area under exotic varieties of tobacco, mostly in the Rangpur district, due to development of this industry is also reported.

Noteworthy among other achievements are the increased production of farm-yard manure making nearly all the farms self-supporting in their manurial resource; increased production of silage in farms, particularly at Dacca and Rangpur, in which the annual output was 350 and 250 tons respectively; and the successful demonstration of the value of Napier grass as the heaviest yielding fodder crop. The success attained by the utilisation of sewage for irrigation at the Dacca Sewage Farm in the production of fodder crops, etc., attracted the attention in foreign countries and detailed information in the matter has been supplied to the American Consul in Calcutta.

5. **Demonstration and propaganda.**—On the demonstration and propaganda side financial stringency stood in the way of expansion, but evidence was not wanting to prove the success of departmental activities in this direction. The number of private farms has increased from 140 to 165, and there is definite indication of a real demand for farming on modern lines. These farms as well as those in Court of Wards' and Government Estates serve as powerful centres for the propagation of departmental races and methods. Much of the success is due to the unstinted support lent to the department by the district officers and the practical interest taken by an increasing number of private gentlemen in the improvement of agriculture in their estates in collaboration with the department.

6. **Agricultural education.**—Owing to the existing financial difficulties the scheme for an Agricultural Institute at Dacca has no chance of being taken up in whole or in sections in the near future. The scheme for the introduction of agricultural classes in Middle English and High English Schools on the Punjab lines is still in the experimental stage. But actual experience gained from the working of such schools has revealed certain practical difficulties.

One of the essential factors for the success of the scheme is the proper selection of the schools. In doing so particular attention should be paid to local environment, attitude of the parents and guardians of the pupils and last but not the least a careful investigation of real demand for agricultural education in a particular locality. The Director of Agriculture has drawn attention to the problem of arranging for field work to be done out of school hours by day scholars. To overcome this difficulty the Inspector of Agricultural Schools has been trying the experiment of allowing such scholars to do cultivation work at home on land set apart by their parents and guardians under the supervision of the agricultural teacher. There is however an undoubted danger of the system of agricultural education being divorced from practical manual training in the field and the energy of the agricultural teacher being frittered away by his being overburdened with the work of supervision in the private plots of the students. The Minister in charge, therefore, attaches great importance to a satisfactory solution of the problem and would be glad if the Director of Agriculture could give his personal attention to it. The handicap to agricultural work in the schools caused by the extensive periods of vacations and numerous holidays noticed by the Director deserves special consideration. In these matters collaboration with the Education Department seems essentially necessary and it is hoped that this will be effected without delay. Government also endorse the remarks of the Director in regard to inefficient schools. There should be no hesitation in withdrawing financial assistance from those schools which are either moribund or show no signs of improvement.

7. In the Agricultural Engineering Section useful work has been done towards the improvement of the sugarcane crushing machinery designed by Mr. Peterson, the Agricultural Engineer. Tests with this type of crusher have shown that it has a uniform capacity of dealing with 25 to 30 maunds of cane per hour with an extraction of 70 per cent. on normal cane. An improved cane-juice boiler designed by the Agricultural Engineer has also been installed at Dacca for carrying out experimental tests. These experiments have been undertaken with the aid of the grant made by the Imperial Council of Agricultural Research.

8. **Sericulture.**—The Bengal Sericultural Department worked on the same lines as in previous years. Attention was paid to increasing the outturn of mulberry leaf and at the same time lowering the cost of its production. Experiments with different kinds of manures have shown that the outturn of leaf can be doubled by the judicious application of manure. In this way it has been found possible to reduce the cost of purchasing of leaf from outside sources. The substitution of expensive

bush mulberry by tree mulberry also makes for reduction of expenses of production. Steps have accordingly been taken for an extension of the cultivation of tree mulberry by the distribution of saplings.

The sericultural industry is passing through a state of depression owing to slackness of business and severe competition both in the real and artificial silk market. In these circumstances and in view of the need for economy Government (Ministry of Agriculture) have decided to re-examine the whole policy of the Sericulture Department in the light of the existing conditions of the industry with a view to adjusting the work of the department according to present needs. A questionnaire has accordingly been issued and the matter will shortly come up for consideration in the light of the replies received.

9. **Acknowledgment.**—Government in the Ministry of Agriculture has much pleasure in recording their appreciation of the valuable services rendered by Mr. Finlow. He has spared no pains to raise the standard of usefulness of the department under his charge. They have also much pleasure in acknowledging the services rendered by an increasing number of district officers towards the development of agriculture. By the cruel death of Mr. James Peddie at the hands of an assassin the department has lost one of its ardent and enthusiastic supporters. Mr. Peddie was a great believer in the improvement of the lot of the agricultural population through the beneficient activities of the department and wherever he went, Mr. Peddie interested himself in agricultural work. The Minister in charge also notes with pleasure the readiness with which non-official gentlemen rendered service as members of the Agricultural Board and of the various committees attached to the department.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 28th October 1931.

Summary.—During the week moderate to heavy rain fell in East and parts of West Bengal; elsewhere the fall was light. The recent rain has benefited the standing crops generally. Field operations for spring crops are proceeding but the progress is being retarded in places for heavy rain. Distress continues in parts of Bogra where distribution of gratuitous relief is progressing. The average price of common rice for the province has risen by about 0·12 per cent. as compared with that of the previous week.

HIJLI ENQUIRY REPORT.

PRESENT:

The Hon'ble Mr. Justice S. C. Mallik, I.C.S., *Chairman*,

and

Mr. J. G. Drummond, I.C.S., *Commissioner, Rajshahi Division.*

How we were appointed and what we were asked to do.—Under Bengal Government Resolution No. 1321P.D., dated the 3rd October 1931, we were appointed a Committee to enquire into the occurrence at the Hijli Detention Camp on the 16th September 1931. The terms of reference were to investigate the occurrence, its causes and incidents and to submit to the Government of Bengal a report of our findings.

2. **What we did and how we proceeded.**—We assembled at Hijli in the evening of Monday, the 5th October, and began our investigation the following day. Both the detenus and the camp staff were represented by legal advisers who were allowed to cross-examine witnesses. After the evidence was recorded we allowed the legal advisers to represent their respective cases fully before us. We went round the Detention Camp as many as four times altogether, including a visit we paid at night time in order to see what the place would look like (with the compound lamps all lighted) at night.

3. We examined 58 witnesses altogether, out of which there were as many as 21 detenus and 4 "Faltus," which means convict servants working as attendants on the detenus inside the camp. Besides these witnesses as also the medical witnesses, the police witnesses and the Commandant Mr. Baker, we examined three gentlemen who apparently had very little connection with the incident in question, and these three witnesses were Rai Sahib Anath Bandhu Chakravarti, the Assistant Commandant, who was lying ill at his house at the time, his nephew Babu Ambica Charan Roy who was at the time living with the Rai Sahib, and Babu Birendra Kumar Das Gupta, the jailor of the additional special jail at Hijli. With the exception of Rai Sahib Anath Bandhu Chakravarti, Babus Ambica Charan Roy and Birendra Kumar Das Gupta, Captain N. N. Chaudhuri, the Civil Surgeon of Midnapore and Dr Mazumdar and Dr. Jotindra Mohan Das Gupta, two doctors belonging to the Railway Hospital at Kharagpur, who in a sense may be called independent witnesses, practically all the other witnesses we could examine were interested, belonging as they did either to the side of the detenus or to the side of the staff. In view of this fact we have had to consider the statements of these witnesses very carefully in the light of probabilities and such independent or circumstantial evidence as was found available.

4. **Description of the camp.**—For the better understanding of this report we have appended a plan of the Detention Camp drawn to scale. The plan shows the position of the sentries on the night of the 16th September. The detenus are housed in what was meant to be the Collectorate of the new district of Hijli lying east and west. This is a long and high two-storeyed building; in the centre is a lofty tower which is a landmark for miles around. For the accommodation of the camp a space 1,000 feet long and 700 feet broad has been enclosed with a double fence of barbed wire. The building is in the middle of this space or compound. Besides the surrounding fences there are several internal fences of barbed wire; in particular there is barbed wire on each side of the road which leads from the main gate to the south-east corner of the building. The guard room is opposite and close to the main gate. The quarters of the guard constables are about 400 yards to the west of the guard room. The Commandant and Assistant Commandant live about ¾ mile and the armed Inspector about 1½ miles from the main gate but are connected with the guard room by telephone.

5. **Undisputed facts.**—The occurrence which we are to investigate was the opening of fire by the guard on the detenus in Hijli Detention Camp on the night of the 16th September at about 9-30 p.m. Before we proceed to analyse the evidence it would, in our opinion, be convenient to state briefly the points about which there is no dispute.

6. There is no dispute that an alarm was given by the sentry inside the camp. There is no dispute that a number of constables rushed into the camp under Havildar Rahaman Khan. There is no dispute that the constables opened fire on the main building in the camp where the detenus were residing; and there is no dispute that as a result thereof two detenus, Babu Santosh Kumar Mitter and Babu Tarakeswar Sen Gupta, were killed, one on the ground floor of the building and the other upstairs, and a number of other detenus, twenty altogether, received injuries, and in some cases the injuries were of a severe nature necessitating in one case—the case of detenu Babu Gobinda Pada Dutt—the amputation of the left arm. It is undisputed also that the sentries and some of the constables who entered the compound after the alarm was given were armed with smooth-bore Martini Henry muskets with triangular bayonets, that those who fired seem to have used ball and buckshot indiscriminately and that some of the injuries on the detenus were gunshot wounds, some were stabs such as a bayonet might have caused and some bruises that might have been due to blows from a *lathi* or the butt of a musket. But the two parties, we mean the constables on the one side and the detenus on the other, were at variance as to how the incident had begun and as to how the occurrence took place.

7. **The police version of the occurrence.**—The version of the constables was as follows. There was an interference by some of the detenus with sentry No. 3, Chandra Singh. These detenus made a deliberate attack on Chandra Singh, whereupon Chandra Singh fired a shot in the air and raised an alarm saying "Guard turn out," and two patrol constables, Chandrikalal and Nashib Singh, who had come to his aid, also fired shots. Thereupon the detenus ran away. There was a similar interference with sentry No. 7, Sirajul Hussain, whose bayonet was snatched away and who had to fire as many as three shots in order to drive away his assailants. Some of the detenus were then making for sentry No. 8. In the meantime the guard, which is located in a building opposite the main entrance to the camp, on hearing the alarm, turned out and came between the two gates in charge of Havildar Shekhar Singh. Shekhar Singh, however, left the men there and went back to the guard room to get orders from the Havildar-in-charge Ramsevak Pande as to whether the men should be taken into the camp. The Havildar-in-charge sent a telephonic message immediately to the Assistant Commandant Rai Sahib Anath Bandhu Chakravarti, telling him that a riot had begun inside the camp between the sepoys and the Babus and asking him to give the information to the Commandant, Mr. Baker. A telephonic message was sent to Inspector Marshall also, who was in his house at the time, about 1½ miles away. In the meantime the men between the two gates were joined by several other constables—the alarm party who arrived in charge of another Havildar, Rahaman Khan, and under orders of Rahaman Khan the inner gate was opened and all the constables assembled there rushed in. Rahaman Khan, however, halted the men near a culvert which was only a few yards beyond the inner gate and 85 yards from the main building. Leaving his men there, according to the story of the constables, Rahaman Khan advanced with 2 or 3 sepoys and proceeded in the direction of sentry No. 7. Meanwhile the detenus had begun advancing towards the sepoys armed with mosquito-net poles, when two constables Haringi

Singh and Ramjatan Singh, who had nothing but a small *danda* and a stick in their hands, approached the angry detenus with folded hands and entreated them not to advance any further; and when the detenus without paying any heed to the entreaties of Haringi and Ramjatan hit them with mosquito-net poles, and when the detenus in the building were throwing down missiles such as brickbats, mosquito-net poles, etc., the sepoys opened fire, and as their intention was not to hit any one of the angry crowd of detenus but only to frighten them away, they fired high. On this firing the detenus retreated, after which the Havildar-in-charge, Ramsevak Pande, came and ordered them back to the guard room. Rahaman Khan's case was that when proceeding towards sentry No. 7 he had managed to go past the detenus, and from sentry No. 7 he had gone up to sentry No. 5 to see if there had been anything wrong there, after which, on hearing Ramsevak Pande crying out, he returned. Mr. Baker, the Commandant, who happened to be in the Kharagpur Officers' Club at the time, on receiving the telephonic message from Rai Sahib Anath Bandhu Chakravarti, immediately left for the camp and arrived there about 10 minutes after the occurrence, almost simultaneously with Inspector Marshall, and finding everything quiet he went round the sentry posts, coming to sentry No. 3 first, Nos. 4 and 5 next and to No. 7 last. When he was going away from sentry No. 7 he met detenu Babu Prafulla Ghose who asked him to come and see the injured persons inside the building and to make arrangements for medical relief. Mr. Baker went into the building, saw the injured detenus, sent a telephone message to Dr. Mazumdar at Kharagpur and had the wounded persons removed to the Kharagpur hospital as quickly as possible.

8. **The version of the occurrence according to the detenus.**—According to the detenus' case there was no interference either with sentry No. 3 or with sentry No. 7 or with sentry No. 8. There was an alarm given, but according to them (the detenus) it was a prearranged affair. The sepoys rushed in through the inner gate shouting "*Hukum mil gia, Sala log ko maro*," came up the road leading from the gate to the main building, and from a place which was about 20 yards from the south-east corner thereof began firing indiscriminately on the building without any provocation of any kind given to them. As a result of this firing Babu Santosh Kumar Mitter who was on the ground floor was shot down, Babu Tarakeswar Sen Gupta who was upstairs was also shot down, and a number of other men received gunshot wounds. According to the detenus some of the sepoys then came into the building and assaulted some of the inmates there with bayonets, *lathis*, etc., and some of them also fired a few shots there causing injuries thereby, and afterwards they all left. Mr. Baker, the Commandant, arrived according to some, half an hour, according to some others, one hour, and according to some others again an hour and a half after the incident.

9. **Analysis of the evidence and our conclusions therefrom as to what took place up to the stage of firing.**—From what we have stated above it would appear that the fact that there was an alarm given is undisputed. That being so, the question whether there was any interference with sentry No. 3 and whether there was any scuffle there of any kind has no great importance in itself. It derives its importance only in connection with the question whether the alarm was pre-arranged or not—a point which was disputed before us.

10. On behalf of the detenus it was urged that the whole thing was pre-arranged, the alarm as also the whole affair. We are unable to agree in this view of the matter. The facts and circumstances which were disclosed before us in evidence would not be consistent with this theory. To begin with, the evidence of Babu Tarapada Gupta, one of the detenus, clearly shows that the first thing that he heard was a sound coming from the south-west of the tower hall, and the place where sentry No. 3 was posted was on the south-west of the tower. Then, if the whole thing, including the giving of the alarm, was a pre-arranged affair, there would hardly be any explanation of the fact that a man was found by some of the detenus running towards the gate crying "*Kuchh nehi hua, kuchh nehi hua, rokho, rokho.*" Possibly this man was one of the patrol constables, who, when he found that the detenus after that *golmal* near sentry No. 3 had left the place, and when he heard that sepoys had assembled between the two gates, ran towards the gate in order to prevent an inrush of the constables. Then, if the whole affair had been a pre-arranged one, the Havildar-in-charge would not have sent that telephonic message so soon to the Assistant Commandant, for if Mr. Baker, the Commandant, would happen to be at home at the time he would be arriving at the place in 3 or 4 minutes after getting the message. We are, therefore, of opinion that there was some kind of interference with sentry No. 3 in consequence of which Chandra Singh gave the alarm, and that the whole thing was not a pre-arranged affair as the detenus wanted us to believe. But the story that Chandrikalal and Nashib Singh participated in the incident that happened at sentry post No. 3 seems to us to be extremely doubtful. Sentry No. 3 did not tell Mr. Baker anything on the point when Mr. Baker went round the sentries on his arrival at the camp soon after the occurrence, and although both sentry No. 3 and the two patrol constables Chandrikalal and Nashib Singh wanted us to believe that Nashib Singh and Chandrikalal remained with sentry No. 3 all the time till 10 p.m. when Chandra Singh was relieved, Mr. Baker did not find either of the two men, Chandrika and Nashib, there.

11. While we are on the question whether there was any interference with sentry No. 3, we might deal with the question whether there was any interference or scuffle at sentry post No. 7. That there was some incident at this sentry post also can hardly admit of any doubt. Sirajul Hussain, the man who was at this post, spoke about it to Mr. Baker very soon after the occurrence. But Sirajul's story of his bayonet having been snatched away from his rifle seems to us to be extremely doubtful. To begin with, Sirajul made no mention of this fact to Mr. Baker. Then the bayonet which Sirajul had attached to his musket could not be wrenched off. Any one who took it off would have to know

the way in which it has to be turned before it can be removed. We may in this connection mention that the spot where the bayonet was recovered a day or two after the occurrence just outside the outer enclosure of the camp was within easy reach of where Sirajul Hussain was posted.

12. As regards what actually took place after the constables had gone in through the inner gate, the story which the sepoys gave us will not in our opinion bear a moment's scrutiny. Their story was that the detenus in the building were throwing missiles when there was a body of detenus armed with mosquito-net poles in between the building and where the sepoys stood. If there was any flinging of missiles by the detenus in the building in such circumstances, the missiles were more likely to hit the detenus in front of the sepoys than the sepoys themselves who were hopelessly out of range if their own evidence is to be believed. As regards the little story of Haringi Singh and Ramjatan Singh, with nothing else than a small *danda* in the hand of one and a stick in the hand of the other, approaching the detenus with folded hands entreating them politely to desist, we are unable to place any reliance on it. In the first place, ordinarily it is not in the nature of these sepoys to behave in that fashion. Secondly, there was no trace of their sticks (which they said were broken in the encounter). Then, this story of approaching the detenus with folded hands finds no place in the evidence that was given before the investigating officer soon after the occurrence. There is another reason why the sepoys' story that some detenus were standing in front of them on the camp compound at the time they fired cannot be believed. If the sepoys wanted to stop the detenus from proceeding any further towards them they would not have fired high as they did. They would have fired low to make their firing effective so that the detenus might not proceed any further towards them. In their evidence they no doubt say that when firing they had no intention to kill anybody but only to frighten the detenus away. If they had no other intention than to frighten the detenus away, it is difficult to understand why instead of firing to their left or right towards the *maidan* they fired upon the building itself, a building where so many of the detenus lived. The story of the sepoys that they did not proceed further to the north of the culvert which was only a few yards from the inner gate where they say they had been left by Havildar Rahaman Khan has been falsified, also by the testimony of Ramsevak Pande, the Havildar-in-charge, when Ramsevak says that he found the sepoys about 15 or 20 yards only from the building. Finally these constables' evidence entirely fails to explain the injuries other than gunshot wounds found on the detenus' persons. We are unable, therefore, to accept the version of the occurrence as given by the constables, and we are clearly of opinion that the constables were only about 20 yards from the south-east corner of the main building when they opened fire on the building, and that at the time they opened fire there were no detenus in between them and the building.

13. Before leaving this part of the case we think we should make some observations on the story that was given by Havildar Rahaman Khan. Rahaman Khan's story was that he left his men near the culvert and accompanied by 2 or 3 sepoys proceeded northwards, and, although there were some detenus before him at the time, he somehow managed to edge between them and a wire fence and reached sentry No. 7, and after questioning sentry No. 7 and telling him not to fire again unless the detenus would advance towards him he proceeded onwards to sentry No. 5. This story would show that he was not present with his men at the time of firing and that he had left the place some time before the firing began. Sirajul Hussain, sentry No. 7, however, entirely falsified him on the point. According to Sirajul Hussain, Rahaman Khan came to him after the firing and *golmal* had absolutely ceased. Then, it is difficult to understand how Rahaman Khan would succeed in getting past the armed detenus when his followers Aminulla and Sitaram Singh, the two sepoys who were accompanying him, could not. We are inclined, therefore, to hold that Rahaman Khan was present at the firing. As to whether the firing was done under the distinct orders of any one it is difficult to say. Possibly Rahaman Khan, the Havildar at the spot, gave the orders; possibly some one of the sepoys fired a shot on his own initiative and the other sepoys only followed suit. The story which the sepoys wanted us to believe can, therefore, in our opinion be safely rejected on the ground that it could not be a true representation of what actually took place at the time.

14. While we are unable, as stated above, to accept the sepoys' version of the occurrence, we are unable at the same time to say that we have got from any one of the witnesses an absolutely faithful picture of all that happened that night near the south-east corner of the building before the firing began. The detenus whom we examined wanted to show that they were wholly non-violent. But against that we have the following facts. Some of the detenus must have been in an aggressive mood as is shown by certain incidents to be recounted later on, which happened before the occurrence of the 16th. Although Khan Sahib Altafuddin Khan, Town Inspector of Kharagpur, started an investigation on the early morning of the 17th and although Mr. Douglas, District Magistrate of Midnapore, held a formal enquiry a day or two later, none of the detenus would make any statement to either of these officers. They never gave out the details of what happened to any one in authority until they were examined by the Committee. A version of the occurrence which is kept bottled up for so long must be received with caution, especially when it is on the face of it at least exaggerated. Several detenus put the members of the attacking party at 50 to 60, many of them armed with muskets, and say there was continuous firing for 10 to 15 minutes. This would imply the discharge of several hundred rounds, but as a matter of fact only 29 were fired from first to last. Again there was the admission made by Babu Hemanta Kumar Turafdar at an interview with his brother on

19th September; he was overheard by Babu Tincori Sen, Sub-Inspector of Police, to say that some of the detenus wanted to attack the constables with mosquito rods but that he restrained them. There is the admission made by some constables to Inspector Marshall that there was a scuffle near the eastern porch of the building. Then, according to the investigating officer, although he did not find anything unusual anywhere on the compound, he found a few brickbats lying about near sentry post No. 8, as also one mosquito-net pole on the football ground not very far from the corner. Mr. Baker also found two pieces of broken chairs lying on the ground near the south-east corner of the building. In addition to these facts there is the further fact that was elicited from some of the "Faltus" that the detenus go out for their strolls on the roads as well as on the *maidan* till their evening meal time at 9, 10 or 11 p.m. None of the detenus would admit seeing any of their number outside the building on this particular evening except Babu Manindra Chandra Sen Gupta, who, confronted with a statement made by him in Mr. Baker's hearing, admitted that some of the detenus were challenged by a Havildar for going too near a sentry, although he puts the incident earlier in the evening; and finally we have the slight injuries inflicted on three of the constables. Every one of these points taken by itself might be explained away. But to our mind the cumulative effect is to show that the detenus were by no means all non-violent. What actually happened before the indiscriminate firing by the sepoys on the building was in our opinion this: Chandra Singh, sentry No. 3, gave an alarm on some provocation. On hearing that alarm the guard turned out and joined by the alarm party rushed in in charge of Havildar Rahaman Khan and charged and drove into the south-east corner some of the detenus who might have been roving about. Some of the minor injuries may have been inflicted at this stage. Thereupon some shots were fired by sentries possibly at knots of detenus who seemed to be dangerously near them or who were throwing bricks at sentry No. 8, after which there was a half-hearted retaliation perhaps by some of the younger and more spirited detenus by the flinging down of a few missiles causing slight injuries on two constables (the third man who had injuries says that he was on guard in the tower and that he was hit by bricks while escaping from that isolated position), upon which there was the indiscriminate and wanton firing by the sepoys upon the building itself. When we say that this was what took place before the indiscriminate firing began, we are fully cognizant that this is somewhat of the nature of a surmise and hypothesis. But this surmise is not based on imagination only. It appears to us to stand on much firmer ground. It fits in with what we have stated above and it fits in with the fact that on a number plate on a door upstairs we found marks of a shot which must have been fired from the south or south-west by some one outside the building, and with the story of firing in the direction of the hospital. It fits in moreover with the evidence of Rai Sahib Anath Bandhu Chakravarti, the Assistant Commandant, who was lying ill in his house at the time, his nephew Babu Ambica Charan Roy, and the jailor Babu Birendra Kumar Das Gupta to the effect that what they heard was shouting at first, a few shots after that shouting, an interval thereafter, after which there was the regular fusillade or indiscriminate firing.

15. **Did any of the sepoys go into the building?**—There was a certain amount of controversy before us as to whether any of the sepoys had gone into the building. The detenus' case on the point is that a number of sepoys came into the building, assaulted some of the inmates there with *lathis*, bayonets, etc., and fired some shots also inflicting injuries on some of the detenus thereby. On the one hand there is a total denial of this by the constables; on the other there is the positive evidence of a number of detenus. Dr. Mazumdar of the Kharagpur hospital who examined the wounded persons soon after the occurrence deposed that he saw in many cases wounds which had left burns or had scorched the skin on some of the detenus, indicating thereby that in those cases there had been firing from very close quarters. But the evidence of Dr. Mazumdar does not in some cases fit in with the testimony of the detenus themselves. The detenu, Babu Kunja Behari Bose, in his deposition stated that one of the sepoys, who had come upstairs, fired a shot at him which grazed his back causing a singeing there. Dr. Mazumdar, however, did not find the marks of any such injury on Babu Kunja Behari Bose. According to Dr. Mazumdar, he found on detenu Babu Aswini Kumar Guha a burn above his right elbow, and according to the doctor this burn had been caused by a shot from close quarters. The story which Babu Aswini Kumar Guha himself gave was that he got two shot wounds from some distance. The same may be said about the wound which was found on detenu Babu Shibdas Lahiri. It can, therefore, be very reasonably contended that the description of the wounds as given by Dr. Mazumdar is not of much value on the question whether the gunshot wounds which were found by him on some of the detenus had been from close quarters or not.

16. If the question of the entry of the sepoys into the building rested only on the depositions of the detenus with this evidence of Dr. Mazumdar, we would perhaps have some hesitation in holding that the sepoys had really gone into the building. But there were some other circumstances in the case which, in our opinion, can leave no room for doubt that the constables did actually go in. Babu Tarakeswar Sen Gupta was the detenu who was shot dead while standing on the upper verandah. Besides the gunshot wounds which were found on him by the Civil Surgeon of Midnapore, who held the *post mortem* examination, Babu Tarakeswar had two other injuries on his head, and these two injuries, according to the Civil Surgeon, had probably been caused by a blow. According to the Civil Surgeon they could not possibly have been caused by a fall after the man had received the gunshot wounds. The two injuries on the head of Babu Tarakeswar Sen Gupta could not therefore be explained in any other way than that he was hit by some one of the sepoys who had gone upstairs, remembering that Babu Tarakeswar, according

to the evidence, was a man who could not walk about with ease.

17. Babu Sabita Sekhar Roy Chowdhury was another detenu in B block upstairs. His story was that when he was nursing Tarakeswar Babu a sepoy charged him with a bayonet and he fell down and became senseless. Dr. Mazumdar found on Babu Sabita Sekhar Roy Chowdhury as many as four wounds, two of which were incised and two punctured; and of the two punctured wounds one was 1" deep and the other 1½" deep. According to Dr. Mazumdar these two wounds had probably been caused by a bayonet. Babu Sabita Sekhar, as we have stated above, was an inmate of Block B upstairs, and it was upstairs that he was found lying in a wounded condition. Having regard to the serious nature of the two punctured wounds we do not think it could be contended that Babu Sabita might have received the wounds when he was somewhere in the camp ground downstairs and after having received those wounds had run upstairs. The evidence is that no blood marks were found anywhere on the ground and the punctured wounds which Babu Sabita Sekhar had on him could not but have caused profuse bleeding.

18. In connection with the question whether the sepoys had really gone into the building or not there is another fact which deserves consideration. On one of the leaves of a door upstairs we found marks of gunshot. Between this spot on the door-leaf and the ground below there is a masonry parapet. There are some small holes in this parapet. But in our opinion it was not likely that a shot, when fired from the ground below and from a distance, would pass through one of these holes and hit the door where we found some remnants lodged. The detenus' story was that the door at the time happened to be closed and the mark of gunshot that was found on it was the result of some firing by one of the sepoys inside the room. The balance of probabilities so far as this point is concerned is unquestionably in favour of the detenus' story. On a consideration, therefore, of the evidence as we have before us we are clearly of opinion that some of the sepoys did go into the building and were responsible for some casualties that took place in the eastern portion thereof.

19. **Was the firing justified?**—We have recorded our findings as to what took place in the evening of the 16th September. Having regard to our findings on the question of the alarm raised and also on the question whether the alarm was pre-arranged or not, we hold that the entry of the sepoys into the compound after the alarm had been given was justified. But there was, in our opinion, no justification whatever for the indiscriminate firing (some 29 rounds were found to have been fired) of the sepoys upon the building itself; resulting in the death of two of the detenus and the infliction of injuries on several others. There was no justification either for some of the sepoys going into the building itself and causing casualties of various kinds to some others of the detenus.

20. **Insinuation by the detenus that Inspector Marshall and the Commandant, Mr. Baker, were implicated in the affair.**—Some of the detenus in their statements before us insinuated that in this shooting affair both Inspector Marshall and Mr. Baker were implicated. According to the detenus, Inspector Marshall had interfered with their drill and Mr. Baker, when a complaint was made to him, told Inspector Marshall not to go into the camp again. According to the detenus, Inspector Marshall, in spite of the orders of Mr. Baker to the contrary, did enter into the camp both on the 15th as well as on the 16th. One of the detenus, Babu Manoranjan Roy, who was the manager of C Block Mess, stated before us that at about 6 p.m. on the 16th, when there was something like a parade of the sentries going on outside the gate and when Babu Manoranjan was between the two gates, having gone there in connection with some work with the bazar contractor, he heard Inspector Marshall talking with the sepoys and saying to them, "Why did you let them off? Why didn't you shoot them?" This evidence of Babu Manoranjan was to a certain extent corroborated by another detenu, Babu Purnendu Dastidar, manager of B Block Mess. Babu Purnendu himself did not hear the words which Inspector Marshall was using, but Manoranjan Babu at the time told him what he had heard Inspector Marshall say. The fact that Babu Purnendu did not make any attempt to exaggerate is certainly a point in favour of the detenus' story. But this story as given by Babu Manoranjan and by Babu Purnendu, it must be said, suffers from the fact that it was given many days after the incident had occurred, and also from the fact that there was no complaint of any kind made by either of them in that connection to Mr. Baker, the Commandant. It seems most unlikely that such words would be used in a detenu's presence; and they would be meaningless if they referred to action by a gate sentry who does not carry any firearms. We do not, therefore, find it established that Inspector Marshall even indirectly inspired any attack on the detenus. As regards the visit of Inspector Marshall to the camp on the 15th and the 16th, Mr. Baker has explained that the Inspector went in once with him (Mr. Baker) and on the other occasion to make arrangements about the sentries under his orders.

21. Then as regards the complicity of Mr. Baker, some of the detenus no doubt suspected that Mr. Baker was at the bottom of the affair. They had before them the fact that it was on account of the report of Mr. Baker about illumination of the tower that a reduction in their allowance from Rs. 32 to Rs. 27 per month was ordered by the Government. They had before them the fact that Mr. Baker had on the morning of the 16th punished one of their comrades, Pankaj Babu, and ordered him to be detained in one of the cells for seven days. And they had before them also the fact that sentries under his orders were posted closer to the building, which to them meant further encroachment on their already restricted freedom and liberty. To a mind like that of the detenus, labouring under the belief that injustice had been done to them by the Government when they were placed under detention

without any trial, these facts might raise suspicion that Mr. Baker, who is a servant of Government, was also implicated in the shooting affair. But to a dispassionate mind these things would mean nothing. If Mr. Baker had reported to the Government it was only because there had really been illumination of the tower on the 28th July, the day after the murder of Mr. Garlick. If Mr. Baker had punished Pankaj Babu it was only because Pankaj Babu had assaulted the camp doctor. And if Mr. Baker had posted sentries nearer the building it was only because they were posted near the cells and washing sheds in which fires had broken out on more than one occasion at night time. Some of the detenus told us that they had not found Mr. Baker so kindly and courteous to them as before and they had noticed this change in him since the meeting at the Dalhousie Institute. Mr. Baker emphatically denied any such change in his behaviour towards the detenus, and one or two letters addressed by him to the detenus would show that there was really no such change in him. In connection with the question of complicity of Mr. Baker in the shooting affair, the way in which Mr. Baker acted immediately after the occurrence ought, in our opinion, to be taken into consideration. The evidence is that he hurried to the place of occurrence within ten minutes, and the evidence shows that on arrival at the camp he did all that was possible to do for the wounded detenus. According to some of the detenus, Mr. Baker did not arrive till about half an hour after the occurrence; according to some till one hour; and according to some others again till 1½ hours after the incident. These estimates of time as given by the detenus were in our opinion mistaken. A certain degree of over-estimation is not altogether unnatural in the circumstances. Some of their comrades were dead, and some were perhaps dying, and any little delay in medical help arriving would naturally appear to them to be inordinately long. That Mr. Baker did arrive within a very short time after the occurrence would appear pretty clear from the testimony of Dr. Mazumdar of the Kharagpur hospital. According to Dr. Mazumdar, the telephonic message which Mr. Baker sent to him after Mr. Baker had gone round the sentries, after he had gone into the building and after he had seen the wounded persons, was received at Kharagpur at 10 p.m. There is further corroboration from the Assistant Commandant who heard his car pass just after the firing stopped. Having regard, therefore, to the facts and circumstances mentioned above, we cannot but hold that neither Mr. Baker nor Inspector Marshall had any complicity in the shooting affair. Mr. B. C. Chatterji, who represented the detenus before us, also frankly admitted that on the evidence as it stands he could not ask us to hold that either of these two officers had been privy to the shooting affair.

22. **Incidents that led up to the occurrence on the night of the 16th September.**—The occurrence took place on the night of the 16th September. There had been before that date some incidents which might be said to have led up to it. On the 28th July, the day following the murder of Mr. Garlick in Calcutta, the tower was illuminated by the detenus. According to the detenus this illumination was done not in connection with Mr. Garlick's murder but it was only one of the many occasions when the detenus "in a sporting spirit" chose to illuminate the tower. There is evidence, however, before us to show that according to some of the detenus this illumination was done to celebrate the acquittal by the High Court of some of the accused in the Dalhousie Square bomb case; while according to others it was in honour of the death of one of their compatriots, possibly meaning thereby the man who shot Mr. Garlick and who himself was shot dead at the spot. Whatever that may be, this matter was reported by the Commandant to the Government, and as a result thereof the monthly allowance of the detenus was reduced by an order of the Government from Rs. 32 to Rs. 27. There is evidence also that this tower was illuminated when there was an attack on Mr. Cassells and also when Inspector Asanullah was murdered at Chittagong. The order of reduction of the monthly allowance was followed by the breaking out of fire in one of the *kutcha* sheds in the camp, and although some additional sentries were posted in the compound, other fires broke out in some of the cells which also were *kutcha* structures. The breaking out of these fires necessitated the closing in of the guard by putting sentries nearer to the main building, and this, the evidence shows, was not liked by the detenus. The change in the arrangement of the guard that was done on the 23rd August and also on the 9th September on the one hand meant additional work for the guard and could not therefore have been very palatable to them, and on the other was not liked by the detenus themselves. These little things culminated in the incident of the 15th September. On the 15th September when a detenu, Babu Dinesh Chandra Sen, was being taken away from the Hijli Detention Camp on transfer to the Buxa Dooar Camp, a number of detenus tried to come between the two gates to say good-bye to him. The gate sentry would not allow them to go past the inner gate, and there was in consequence thereof some quarrel and some scuffle. According to the detenus, the gate sentry insulted them by pushing them out through the inner gate. According to the gate sentry, the detenus fell on him and began to beat him and a portion of his shirt was torn off. Whatever that may be, there is no doubt that there was a quarrel and some kind of scuffle. The evidence is that the gate sentry, Sitaram Singh, raised an alarm with the result that a number of sepoys came up to the gate armed with *lathis* and wanted to go into the compound, apparently with the object of giving a beating to the detenus, and it was only the timely arrival and intervention of Mr. Baker that prevented them from giving effect to their desire. Mr. Baker tried to pacify the men and succeeded in sending them away. He, however, took Sitaram Singh into the camp to see if Sitaram could identify any of the detenus, who, according to him, had assaulted him. The detenus objected to Mr. Baker's going round the rooms for the purpose of identification. Mr. Baker did go round the rooms, but Sitaram

could not identify any of the détenus as his assailant. This incident of the 15th followed by the action which Mr. Baker took in the matter must have left the sepoys considerably agitated, and the detenus also must have felt ignominy when the gate sentry was taken round their rooms to find out who his assailant was. As a result the incident of the 15th must have further intensified strained feelings on both sides.

23. **Causes of the occurrence.**—It was, in our opinion, this irritation and high tension which brought about the deplorable affair of the 16th. Some of the détenus were in an aggressive mood and ready to molest or pick a quarrel with the sentries. If they had not done so there would have been no alarm and no shooting. To that extent, therefore, they must be held responsible in the first instance for what happened. The sepoys on their part had felt aggrieved when one of their comrades, we mean the gate sentry Sitaram Singh, was roughly handled by some of the detenus, and naturally they resented when Mr. Baker refused them permission to go into the camp. This strong resentment was, in our opinion, rankling in their minds, and they seized the first chance that they got at the sounding of the alarm of going into the camp and behaving in the fashion they did. If there had not been the timely intervention of Mr. Baker in the afternoon of the 15th September it is not unlikely that there would have been on that very afternoon an occurrence like the occurrence of the 16th, though not of so serious a nature.

24. We have given above the incidents which, to our mind, operated as the direct cause of the occurrence on the night of the 16th. But besides this direct cause there were some indirect causes also, by which we mean circumstances which made the occurrence of the 16th September possible. The Hijli Detention Camp is a pretty big place, the number of detenus detained there being between 170 and 180. There is a Commandant and also an Assistant Commandant. But both of them live at a distance of about three-quarters of a mile from the camp itself. Inspector Marshall, who is in immediate charge of the guard, has his residence at least three-quarters of a mile further off, and at night time there remains no one but the guard constables in charge of Havildars to look after the camp. The Commandant, the Assistant Commandant and Inspector Marshall are no doubt in telephonic connection with the guard. But important orders, such as orders to open fire, cannot ordinarily be given by an officer on the telephone and unless the officer sees for himself what the situation really is. From the distance where the Commandant, the Assistant Commandant and Inspector Marshall live one cannot ordinarily come to the camp in less than four or five minutes. On that particular night the Assistant Commandant, Rai Sahib Anath Bandhu Chakravarti, was lying ill at his house and there was no one acting for him at the time. The fact that there was no responsible officer present on the spot was, in our opinion, indirectly responsible for the most deplorable and tragic affair that took place on the night of the 16th September last.

25. **Summary.**—To sum up, our findings of facts are—

(1) Sentry No. 3 on some provocation gave an alarm.

(2) The guard turned out, was joined by the alarm party, passed through the inner gate under the orders of Havildar Rahaman Khan, charged and drove some detenus who might have been roving about into the south-east corner.

(3) Some shots were fired by the sentries, after which—

(4) There was a half-hearted retaliation by some of the detenus, followed by—

(5) A regular fusillade from the sepoys—indiscriminate firing without any justification on the main building, resulting in the death of two of the detenus, Babu Santosh Kumar Mitter downstairs and Babu Tarakeswar Sen Gupta upstairs, and in the infliction of injuries on several others, necessitating in one case the amputation of an arm.

(6) Some of the sepoys with no justification went into the building and assaulted some of the detenus there with *lathis* and bayonets and also fired a few shots there, after which they left.

(7) Ramsevak Pande, the Havildar-in-charge, came in, ordered to cease fire, and withdrew the sepoys to the guard room in haste.

26. The incidents which led up to the occurrence were—

(*a*) Illumination of the tower and consequent reduction of allowance.

(*b*) Breaking out of fires in the *kutcha* sheds in the compound followed by posting of sentries closer to the building.

(*c*) Punishment of one of the detenus, Pankaj Babu, and the order confining him in one of the cells for seven days, and finally

(*d*) The incident that happened at the gate on the 15th on the occasion of the departure of detenu Babu Dinesh Chandra Sen.

27. The direct cause was the feeling of irritation felt by both the detenus and the guard intensified by the incident of the 15th, and the indirect cause was the fact that there was no arrangement for a responsible officer staying at the camp at night time, and at night time the camp was left entirely in charge of the sepoys headed by a few Havildars.

28. We have tried to make this report as full and thorough as possible. If we have succeeded in our attempt it is due to the fact that all possible evidence was available to us and we were assisted in our labours by the lawyers who represented the detenus on the one side and who represented the staff on the other.

NOTIFICATION.

No. 18776P.—3rd November 1931.—Whereas the magic lantern slides below appear to the Governor in Council to contain matter the publication of which is punishable under section 124A of the Indian Penal Code, inasmuch as the said slides bring or attempt to bring into hatred or contempt and excite disaffection towards the Government established by law in British India.

Now, therefore, in exercise of the power conferred by section 99A of the Code of Criminal Procedure, 1898 (Act V of 1898), the Governor in Council hereby declares to be forfeited to His Majesty every copy of the said lantern slides, namely:—

(1) A slide with entry in Bengali as follows:—"Ruling and exploitation are the work of the same Government."

(2) A slide with entry in Bengali as follows:—"There is no salt tax in any other country in the world. It exists in unfortunate India only."

(3) A slide with entries in Bengali as follows:—"It is surprising that the British rulers cannot understand that it is they themselves who are responsible for the loss of

population caused by scarcity of rain. That people are living in poverty and suffering, that hundreds of thousands die of famine is because that it is the rulers themselves who are robbing India of her wealth. When famine breaks out, to save them proportionate taxation is imposed on another set of famished men."

(4) A slide with the entries in Bengali as follows:—"There are still leaves on the trees and the females have not yet become prostitutes. It must hence be said that there is no famine in the locality—Tent."

(5) A slide with entries in Bengali as follows:—"*History of India—Mill.* Had not this been done and Indian cloths stopped by duties from being taken to the markets of England, the wheels of machinery at Manchester and Paisley would not have revolved in spite of the discovery of steam. It is by the sacrifice of Indian industry that the cotton industry in England has grown up. Had India been an independent country then she could have retaliated and prevented English made cloths being brought to India by imposing taxes on them."

(6) A slide entitled "Destruction of cloth industry in India" containing the figure of a boy tied to a tree and of a sepoy whipping the boy. The words "East India Company" are written on the chaprash of the belt worn by the sepoy. Another man has been kept in custody of another sepoy and a woman is crying at some distance.—Bolt's Consideration.

(7) A slide headed "*Bolt's Consideration*" containing the figure of a woman being assaulted by a sepoy. Another person standing at a distance—*Bolt's Consideration.*

(8) A slide showing five persons (weavers) standing at a distance, two of whom carrying *daos* (weapons) and blood coming out of their fingers, which have been cut off.

(9) A slide with entries in Bengali as follows:—"As once Rome had to leave Britain, so, if the English have to leave India suddenly now, they will leave behind a country devoid of education, health and riches—Sir Daniel Hamilton."

(10) A slide with the entries in Bengali as follows:—"Machinery of exploiting India in the name of administration" and containing a figure of an elephant striking its trunk into the map of India. On the trunk it is written in Bengali "Exploitation and repression," and below the slide is written "Bureaucracy" and on the base of the elephant is written "The English."

(11) A slide with the entry in Bengali as follows:—"Wanted revolution."

(12) A slide containing the figure of three circles showing the gradual increase of the red circle with the entry in English "In 1858 the East India Company changed its cloak and became the British Government in India but the heart remained the same."

(13) A slide containing the figure of Subhash Bose with some men with entry in English "Lathi charge on Subhash on Independence Day."

(14) A slide with entries in English as follows:—"Why he asked—should you give the Indians the advantage of knowledge you would only thereby give the means of detecting your own injustice, you have ransacked their country, you have despoiled its people, you have murdered their princes and of course for your own protection, you must keep them deluded, deceived and ignorant—said by Sir Thomas Stratton on 21st March in 1811 in the House of Commons."

(15) A slide with entries in English as follows:—"When any people or country is subjected by a stronger power, it must be taken for granted that one of the first thing the congress will do will be to either destroy, discourage or rigidly control education in the oppressed country for knowledge and subjection cannot work hand in hand. By Agnes Smelly."

SCHEDULE II.

Adaptations of the Indian Income-tax Act, 1922.

PART I.

(*See* section 7.)

Adaptations for the assessment and collection of income-tax in the current financial year on total incomes of Rs. 1,000 and upward and less than Rs. 2,000.

1. For the purposes of the proviso to sub-section (2) of section 18 of the Indian Income-tax Act, 1922, any person responsible for paying any income less than Rs. 2,000 chargeable under the head "Salaries" shall be deemed to have failed to deduct income-tax at the time of making all payments made before the commencement of this Act, and such person may make the adjustments permitted by that proviso.

2. Notwithstanding that the Income-tax Officer has assessed the total income of an assessee under section 23 of the Indian Income-tax Act, 1922, and has found that nothing is payable thereon, he may proceed to determine the sum payable by such assessee by virtue of section 7 of this Act, and such sum shall, for the purposes of the Indian Income-tax Act, 1922, be deemed to be a sum determined under section 23 of that Act.

PART II.

(*See* section 8.)

Adaptations for the assessment and collection of additional income-tax and super-tax in the current financial year.

1. For the purposes of the proviso to sub-section (2) of section 18 of the Indian Income-tax Act, 1922, any person responsible for paying any income chargeable under the head "Salaries" shall be deemed to have made a deficient deduction in respect of the additional income-tax imposed by section 8 of this Act at the time of making all payments made before the commencement of this Act, and such person may make the adjustments permitted by that proviso.

2. Notwithstanding that the Income-tax Officer has assessed the total income of an assessee and has determined the sum payable thereon under section 23 of the Indian Income-tax Act, 1922, he may proceed to determine the further sum payable by such assessee by virtue of section 8 of this Act, and such further sum shall, for the purposes of the Indian Income-tax Act, 1922, be deemed to be a sum determined under section 23 of that Act.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to continue certain provisions of the Indian Finance Act, 1931, to the 31st March 1933; to increase the import duties on brown sugar, boots and shoes, artificial silk yarn and thread, artificial silk piecegoods, camphor and electric bulbs; to impose import duties on raw cotton, machinery and dyes; to impose a surcharge of 25 per cent. on all import duties other than the new duties on raw cotton, machinery and dyes, and on all excise duties including salt; to impose a surcharge on income-tax of 12½ per cent. in the current financial year and of 25 per cent. in the financial year 1932-33; to levy income-tax on incomes between Rs. 1,000 and Rs. 1,999 per annum; and to increase the rates of postage for letters and postcards.

2. Clause 3 provides for the following important alterations in customs tariff:—

(1) Levy of an import duty of 6 pies per pound on raw cotton;

(2) Levy of an import duty of 10 per cent. on machinery;

(3) Levy of an import duty of 10 per cent. on dyes;

(4) Increase in the import duty on brown sugar from Rs. 6-12 to Rs. 7-4 per cwt;

(5) Increase in the import duty on boots and shoes from 20 per cent. *ad valorem* to 20 per cent. *ad valorem* or 4 annas per pair whichever is higher;

(6) Increase in the import duty on artificial silk yarn and thread from 10 per cent. *ad valorem* to 15 per cent. *ad valorem*;

(7) Increase in the import duty on artificial silk piecegoods, camphor, and electric bulbs from 20 per cent. to 40 per cent. *ad valorem*.

3. Clauses 4 and 5 provide for a surcharge of 25 per cent. on all customs import duties exceeding 2½ per cent. *ad valorem*, including those specified in paragraph 2 above excepting the new duties on raw cotton, machinery and dyes, and on all excise duties including salt.

4. Clause 6 read with clause 2 provides that the rate of postage on all inland letters and postcards should be increased by 50 per cent., *i.e.*, the rate for an ordinary inland letter should be one anna and six pies instead of one anna, and the rate for the ordinary inland postcard should be nine pies instead of six pies.

5. Clause 7 (*1*) provides that incomes of Rs. 1,000 and upwards but less than Rs. 2,000 should be subject to income-tax at the rate of two pies in the rupee in the financial year 1931-32 and of four pies in the rupee in the financial year 1932-33.

6. Clauses 8 (*1*) and 9 provide that the rates of income-tax and super-tax now in force should be increased by 12½ per cent. in the financial year 1931-32 and by 25 per cent. in the financial year 1932-33.

7. The Indian Income-tax Act was not so drafted as to provide for such a contingency as a change of income-tax and super-tax rates in the middle of a financial year, at a time when some assessments for the year will have been completed, while others are yet outstanding and when certain payments of salaries and interest on securities will have already been made after deduction of tax at the rates hitherto in force. It is for this reason that clause 7 (2) and clause 8 (2) have been inserted, making certain adaptations of the procedure laid down by the Act and giving the Central Board of Revenue authority to deal with any unforeseen difficulties that may arise, if experience should show that a literal application of the existing law would produce inequitable results. It will be seen that these clauses and any rules made under them will necessarily be of an ephemeral character.

8. Clause 10 provides for the credit to revenue till 31st March 1933 of interest on securities forming part of the Paper Currency Reserve.

Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the promia paid, should the nominee predecease them after five years of admission. The second quinquennial valuation of the Fund has been completed by the actuary to the Government of India, and his report discloses very favourable results. DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 21st November 1931.

Monthly Weather and Crop Report of Bengal for October 1931.

I. **Character of the season.**—During the month under review, the rainfall was in excess of the normal almost throughout the Presidency except in parts of Murshidabad, North Bengal, Mymensingh, Chittagong and in the Cooch Behar State where the fall was below the average. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Preparatory tillage for and sowings of early spring crops were progressing under favourable conditions but heavy rain during the last part of the month retarded the operations in places to some extent.

III. **State of standing crops.**—The state of standing crops was generally fair. The rainfall during the month helped the growth and development of transplanted paddy.

IV. **Prospects and probable outturn.**—The prospects of standing crops were generally satisfactory. The outturn of sugarcane was estimated at 88 per cent. of the normal.

V. **Damage to standing crops.**—No damage to standing crops was reported from any part of the Province.

VI. **Condition of agricultural stock.**—The condition of live-stock was generally fair. Sporadic cases of cattle-disease, however, were reported from five districts of the Province and from the Cooch Behar and Tripura States.

VII. **Failure of pasturage and fodder.**—Excepting in parts of Nadia, Rajshahi, Rangpur, Pabna and Faridpur, no insufficiency of fodder was reported.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the price of common rice of the cheapest quality rose in six districts, fell in seven and remained stationary in the rest of the Presidency. The prices ranged from 8 seers per rupee at Howrah and Tippera to 16 seers per rupee at Birbhum.

IX. **Condition of agricultural population.**—The condition of agricultural population is on the whole fair except in the flood affected tracts of Bogra where distress still continues to be reported.

CALCUTTA, THE 20TH NOVEMBER 1931.

RESOLUTION—No. 6838Vety.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

Read—

Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College for the year 1930-31.

I.—Civil Veterinary Department.

The year was on the whole a healthy one for the live-stock of the province, the mortality being the lowest in the last fourteen years. The equines were practically immune from contagious diseases, and a noticeable feature was the total absence of deaths from Glanders. Rinderpest, however, continues to be the most serious scourge of the bovines, being responsible for about 75 per cent. of the deaths whilst Hæmorrhagic Septicæmia accounted for as many as 2,035 or 16 per cent. deaths.

2. The usual programme of preventive inoculation by the serum alone method for dealing with outbreaks was carried out with success, the total number of deaths amongst cattle so inoculated being only 0·5 per cent. But as noticed in the resolution on the previous year's report the serum simultaneous method of inoculation which confers long immunity is a great desideratum. A demonstration of this method of inoculation was undertaken in the Chandkhali khas mahal area of Khulna district with success. It is hoped that when the ground is prepared by such demonstrations it will be possible to introduce this method of inoculation on an extensive scale.

3. A joint enquiry into the causes of Hæmorrhagic Septicæmia which caused serious mortality amongst the cattle at the Rangpur cattle farm was undertaken by the department and the experts at Muktesar. Mr. MacGregor, Principal, Bengal Veterinary College, made a careful local investigation and submitted a valuable report after the close of the year. It is hoped that the adoption of the remedial measures recommended by him will be conducive of satisfactory results.

4. Much remains to be done yet in the direction of veterinary aid for the ordinary care of animals in the mufassal. But it is gratifying to note that increasing interest is being evinced by local bodies in the matter of establishment of hospitals and dispensaries. Credit is also due to the public at Dimla in Rangpur district where a dispensary building has been erected for the first time almost entirely with local contributions.'

5. The Bengal Village Self-Government (Amendment) Act, 1931, which has been recently passed by the Legislative Council has removed the long-felt disability under which the union boards laboured due to their inability to undertake work for the prevention and treatment of cattle diseases or for the improvement of the breed and health of cattle. The union boards are a valuable agency for affording veterinary aid in the mufassal, and it is hoped that they will now take up the matter in right earnest, so far as their financial resources derived from the rate under section 37 (*b*) of the Act permit.

6. The Minister-in-charge notes with pleasure the names of the officers who did good work during the year and also desires to acknowledge the services rendered by Mr. Kerr.

II.—Bengal Veterinary College.

7. In spite of the withdrawal of Bihar and Orissa students from the college as a result of the opening of the Patna Veterinary College and other counter-attractions, there was no diminution in the number of entrants into the college which continued to attract students from far and wide. The Bengal students topped the list, being 35 per cent. of the total. The number of stipends granted by district boards, however, continued to be poor; but it is hoped that the appeal made to them by the Principal will meet with ready response.

8. The Principal's report contains an interesting account of the work undertaken to enhance the usefulness of the institution as a centre for the spread of veterinary knowledge. Extension lectures and practical studies in meat and milk inspection and the elements of genetics, dairy-farming and poultry-keeping were introduced during the year. Extra classes for the training of sanitary inspectors, compounders, etc., have also been provided. A scheme for a refresher course of training of veterinary assistant surgeons and veterinary graduates is now under consideration in consultation with local bodies. Financial stringency has unfortunately stood in the way of inception of various schemes of veterinary activity prepared by the Principal.

9. On the other hand, it is gratifying to note that every effort has been made to effect economy in expenditure as far as practicable without impairing the efficiency of the institution. The supply of fodder raised in the college compound has enabled an appreciable reduction in the cost of feed of animal patients at the hospital, whilst the receipts from the sale of surplus stock to the public added to the income.

10. The Minister-in-charge is pleased to record his appreciation of the interest and energy shown by Mr. A. D. MacGregor in the administration of the college. He is also pleased to acknowledge the ungrudging services rendered by the non-official members of the committee of management.

RESOLUTION No. 6417F.B.

Calcutta, the 21st November 1931.

1. The Civil Pensions (Commutation) Rules and the amendment to them made by the Secretary of State for India in Council, in exercise of the powers conferred by sub-sections (2) and (3) of section 96B of the Government of India Act are published herewith for general information as an annexure to this Resolution.

2. These rules supersede the rules published in the Resolution No. 1283F.B., dated the 8th March 1927, and will be applicable to Government servants, who are not included in the appendix referred to in rule 3, made by the Secretary of State.

3. The Local Government are the sanctioning authority for applications for commutation of pension of those officers who at the time of retirement were under their administrative control.

Note.—A Pensioner should be considered to be under the administrative control of the Government on which the payment of his pension forms a charge and not the Government which originally sanctioned his pension. Where, however, an application for commutation is made simultaneously with the application for pension, the Government under which the applicant is employed will be the Government competent to sanction the commutation.

4. In so far as such Government servants are concerned, the Local Government have—

(*1*) delegated their powers to the High Commissioner under rule 2 subject to the condition mentioned in (2) below where applicable,

(*2*) decided to allow commutation up to a maximum of one-half of the pension of those officers to whom rule 4 applies and to impose under that rule for such officers the following condition:

> that the residue of the pension which will be left after commutation will be sufficient to maintain the pensioner in accordance with his station in life in retirement.

(*3*) (1) (*i*) Before the commutation of a pension is sanctioned, the pensioner shall produce a certificate as to his expectation of life from the certifying medical authority hereinafter prescribed.

(*ii*) The medical authority shall be:—

(*a*) In the case of an applicant who has been or is likely to be invalided from the service, a Special Medical Board;

(*b*) in case of a pensioner drawing a pension of Rs. 50 and less, a medical officer of not lower standing than a Civil Surgeon, District Medical Officer or Presidency Surgeon; the sanctioning authority may at its discretion require the production of a second medical certificate or direct the pensioner to appear before a Medical Board;

NOTE.—In case, however, where the Medical Officer adds to the age of the pensioner for purpose of commutation, the pensioner should invariably be directed by the sanctioning authority to appear before a Medical Board.

(*c*) in case of a pensioner drawing a pension of over Rs. 50, a Medical Board before which the applicant must appear in person with a certificate signed by a medical officer of not lower standing than a Civil Surgeon, District Medical Officer or Presidency Surgeon.

(II) The certifying medical authority after obtaining from the applicant a statement in Part I of Form B (appended to this Resolution) which must be signed in his presence, shall subject him to strict examination, enter the results in Part II of Form B and record his opinion as to the accuracy with which the pensioner has answered the questions prescribed in Part I regarding his medical history and habits. Lastly he shall complete the certificate contained at the end of Part II of Form B and forward it to the sanctioning authority.

(III) The certificate granted by the certifying medical authority will then be forwarded by the sanctioning authority to the Standing Board which will complete the certificate in Part III of Form B.

(IV) In the case of a pensioner drawing an invalid pension who shall have to appear before a Special Medical Board, the Certifying Board after obtaining from the applicant a statement in Part I of Form B (appended to this Resolution) which must be signed in its presence, shall subject him to strict examination, enter the results in Part II of Form B and record its opinion as to the accuracy with which the pensioner has answered the questions in Part I regarding his medical history and habits. Lastly it shall complete the certificate in Part III of Form B and forward it to the sanctioning authority.

(V) If a persioner after he has once been rejected on the recommendation of the medical authority as not being a fit subject for commutation, or after he has once declined to accept commutation on the basis of an addition of years to his actual age, applies for permission to appear for medical examination with a view to the revision of the original finding of the medical authority, one re-examination will be allowed at his own cost provided that:—

(1) an interval of not less than a year shall elapse between the date of the first medical examination and that of the second; and

(2) the second examination shall invariably be made by a medical board.

When such re-examination is allowed a copy of the report of the first examination should always be forwarded to the medical authority examining him second time.

5. In accordance with rule 7, the Governor-General in Council has been pleased to prescribe the table contained in annexure B to this Resolution in the case of pensioners whose applications are addressed to the Local Government.

6. (*a*) The applicant shall himself pay the medical officer's fee for examination; when

a second medical opinion is required or the applicant is directed to appear before a Medical Board the examination will be made free of charge by medical officers at the request of the Local Government.

(*b*) In case of a pensioner drawing an invalid pension, who shall have to appear before a Special Medical Board, the applicant shall deposit a fee of Rs. 16 into a Government treasury and make over the receipt to the Board before examination.

7. The incidence of the commutation payment will in all cases follow that of the pension, and the commuted amount must be made payable at the treasury at which the pension is being or is to be drawn. If a pensioner who has obtained commutation of a portion of his pension moves thereafter to another province, a note must be made on the Pension Payment Order as to the amount of pension which has been commuted.

8. All sanctions to the commutation of a pension which is voted are subject to the usual rule that the expenditure can be met from sanctioned budget grant.

9. Applications must be in Form A appended to this Resolution and may be made simultaneously with the application for pension.

10. Commutation, when sanctioned, shall take effect from a date, to be named in the order, which will ordinarily be about one month later than the date of the order; and all calculations shall be made with reference to that date. Payment of the commuted portion of the pension will cease from the date specified and the sum payable on commutation will be paid on that date or as soon afterwards as possible.

Note.—In special cases the Local Government may sanction the commutation with effect from an earlier date than that mentioned in this paragraph not preceding the date of the sanction, all calculations being made with reference to such earlier date.

11. In the case of a pensioner who is re-employed in Government service or in the service of a Local Fund and who commutes a portion of his pension before or after such re-employment, his pension, for the purposes of the rules in Chapter XXI of the Civil Service Regulations, shall be taken at the full amount which he might have drawn if he had not commuted a portion of it.

Ordered that the Resolution be published in the *Calcutta Gazette*.

Ordered also that a copy of the Resolution be forwarded to the Accountant-General, Bengal, and to the several departments, including Accounts Department of this Government; the Secretary to the Board of Revenue, Bengal; Director of Public Instruction, Bengal; Surgeon-General with the Government of Bengal; Inspector-General of Police, Bengal; Inspector-General of Prisons, Bengal; Superintending Engineers; Commissioners of Divisions; District Officers; District and Sessions Judges; Conservators of Forests, Bengal; Commissioner of Excise and Salt, Bengal; Director of Agriculture, Bengal; Director of Land Records and Surveys, Bengal; Advocate-General, Bengal; Director of Public Health, Bengal; Inspector-General of Registration, Bengal; Commissioner of Police, Calcutta; Superintendent and Remembrancer of Legal Affairs, Bengal; Chief Judge, Small Cause Court, Calcutta; Private Secretary to the Governor of Bengal; Military Secretary to the Governor of Bengal; Administrator-General and Official Trustee, Bengal; Registrar of Co-operative Societies, Bengal; Chief Presidency Magistrate, Calcutta; Chief Engineer, Public Health Department, Bengal; Nautical Surveyor, Chittagong; Superintendent, Royal Botanic Garden, Calcutta; Veterinary Advisor to the Government of Bengal; Coroner of Calcutta; Municipal Magistrate, Calcutta; Superintendent, Government Printing, Bengal; Press and Forms Manager, Bengal; Director of Industries, Bengal; and Chief Inspector of Factories, Bengal, for information.

In exercise of the powers conferred by sub-sections (2) and (3) of section 96B of the Government of India Act, the Secretary of State in Council, with the concurrence of the majority of votes at a meeting of the Council of India held on the 16th day of September 1925, hereby makes the following rules to regulate the commutation of civil pensions, namely:—

1—(*a*) These rules may be called the Civil Pensions (Commutation) Rules.

(*b*) They shall be deemed to have come into force on 1st April 1925.

2. The powers granted by these rules shall be exercised, in relation to Government servants who are under the administrative control of a local Government, by the local Government, and in relation to other Government servants by the Governor-General in Council, and may be delegated by them to the High Commissioner for India, subject to any condition which they may think fit to impose.

3. A Government servant who is a member of one of the services or holds one of the posts included in the appendix to these rules shall be entitled, subject to the conditions hereinafter specified, to commute for a lump payment any portion, not exceeding one-half, of any pension which has been or may be granted to him under civil rules. But any such commutation shall be subject to the condition that—

(*a*) if the pension exceeds £180 when payable in London, or Rs. 2,057 when payable in India, not less than £150 (or Rs. 1,714) of its value shall remain uncommuted; and

(*b*) if the pension is less than £180 (or Rs. 2,057), not more than £30 (or Rs. 343) of its value shall be commuted, and not less than £120 (or Rs. 1,371) shall remain uncommuted:

Provided that the sanctioning authority may at its discretion relax or waive this condition in the case of a pension granted under the Premature Retirement Rules.

Provided further that in calculating the amount of a pension for the purposes of conditions (*a*) and (*b*) of this Rule, there may be added to it the uncommuted portion of any other permanent pension or pensions payable to the applicant from Indian or other Government revenues.

4. On the application of any Government servant to whom Rule 3 does not apply the sanctioning authority may, on such conditions as it thinks fit to impose, sanction the commutation for a lump payment of a portion, not exceeding one-half, of any pension which has been or is about to be granted to him under civil rules.

5. Applications shall be addressed—

(*a*) in the case of pensioners who draw their pensions from Indian Treasuries, or who, being resident in Colonies having an account current with the Accountant-General, Central Revenues, draw their pensions from the local Treasuries, to the local Government or to the Government of India, as the case may be; and

(*b*) in the case of all other pensioners, to the High Commissioner for India, provided that in the case of pensioners residing in a Dominion or Colony, other than those referred to in clause (*a*) of this rule, the application shall be addressed to the High Commissioner through the official from whom the pension is drawn.

6. No commutation shall be sanctioned until the pensioner has produced a certificate from such medical authority as may be prescribed in this behalf by the sanctioning authority to the effect that his bodily health and prospects of duration of life are such as to justify commutation.

7. The lump sum payable on commutation shall be calculated in accordance with a table or tables of present values which shall be prescribed by the Governor-General in Council in the case of pensioners, whose domicile at the time of first appointment to Government service was Asiatic and by the Secretary of State in Council in all other cases. For the purpose of this rule, the age in the case of impaired lives shall be assumed to be such age, not being less than his actual age as the certifying medical authority may direct; and domicile shall be determined in accordance with provisions of Appendix B to schedule IV of the Superior Civil Services (Revision of Pay, Passage and Pension Rules, 1924).

8. When commutation has been sanctioned the pensioner shall be informed accordingly, and shall have the option of withdrawing his applicaton within one week after being so informed. If he does not withdraw his application within that period, the commutation of pension shall become absolute, and payment of the lump sum shall be made forthwith, payment of the commuted portion of the pension thereupon ceasing.

9. The lump sum, in cases in which application is addressed to the Local Government or to the Government of India under Rule 5 (*a*) shall be payable in India; in all other cases it shall be payable at the Home Treasury the rate of exchange for conversion of the lump sum where the question of conversion arises shall be such rate as the Secretary of State in Council may by order prescribe.

10. If, when the commutation of a portion of a pension has been sanctioned, the pensioner dies on or after the date from which commutation is to take effect, but before receiving the commutation value, this value shall be paid to his heirs.

No. F./2-XVI-R. II./1930, dated Simla, the 22nd October 1930.

Notification—By the Government of India, Finance Department.

The following resolution by the Secretary of State for India in Council is published for general information:—

In exercise of the powers conferred by subsection (2) of section 96B of the Government of India Act, the Secretary of State with the concurrence of the majority of votes at a Meeting of the Council of India held this 20th day of August 1930 hereby makes the following amendments in the Civil Pensions (Commutation) Rules, namely:—

(I) For Rule 6 of the said Rules the following shall be substituted, namely:—

"6. The following provisions apply to Government servants governed by Rule 3.

(1) On receipt of an application for commutation the sanctioning authority shall transmit to the applicant a copy of the Account Officer's certificate of the lump sum payable on commutation in the event of his being reported by such medical board as the sanctioning authority may prescribe to be a fit subject for commutation; and shall at the same time instruct him to appear for examination before the said board within three months from the date of its order, or, if he has applied for commutation in advance of the date of his retirement, within three months of that date but in no case earlier than the actual date of retirement. This intimation shall constitute administrative sanction to commutation, but shall lapse if the medical examination does not take place within the period prescribed in the sanctioning order. The applicant may withdraw his application by written notice at any time before the medical examination takes place, but this option shall expire on his appearance before the medical board.

Provided that if the medical board directs that his age for the purpose of commutation shall be assumed to be greater than his actual age, the applicant may withdraw his application within two weeks from the date on which he receives intimation of the revised sum payable on commutation, or, if this sum is already stated in the sanctioning order, within two weeks from the date on which he is informed of the finding of the medical board.

If the applicant does not withdraw in writing his application within the period of two weeks prescribed above, he shall be assumed to have accepted the sum offered.

(2) Subject to the provision contained in clause (3) of this rule the commutation shall become absolute, that is, the title to receive the commuted portion of the pension shall cease and the title to receive the commuted value shall accrue, in the case of an unimpaired life on the date on which the medical board signs the medical certificate; and, in the case of an impaired life, on the date of written acceptance of the commutation, or the date on which the option of withdrawing the application expires, whichever is earlier. Payment of the commuted value shall be made as expeditiously as possible; but whatever the date of actual payment, the amount paid and the effect upon the pension shall be the same as if the commuted value were paid on the date on which commutation became absolute. If the commuted portion of the pension has been drawn after the date on which the commutation became absolute, the amount drawn shall be deducted from the amount payable in commutation.

(3) If the applicant makes any statement found to be false within his knowledge or wilfully suppresses any material fact in answer to any question, written or oral, put to him in conection with his medical examination, the Local Government may cancel the sanction at any time before payment is actually made; and such a statement or suppression may be treated as grave misconduct for the purpose of Article 351 of the Civil Service Regulations."

(II) Rule 8 of the said Rules shall be omitted.

(III) For Rule 10 of the said Rules, the following shall be substituted, namely:—

"10. If the pensioner dies on or after the day following that on which commutation became absolute but before receiving the commutation, value, this value shall be paid to his heirs."

CALCUTTA, THE 27TH NOVEMBER 1931.

RESOLUTION—No. 14105L.R.

Read—

Letter No. 33 R. C. T., dated the 14th September 1931, from the Commissioner of the Rajshahi Division, submitting a final report on the relief operations in the district of Bogra during the period October 1930 to July 1931.

The report deals with the operations for the relief of distress which prevailed in the district of Bogra during a period of about ten months from October 1930 to before the floods of July 1931. The district consists of two distinct areas—one is known as the Khiar area and the other known as the Pali, or alluvial area. Jute is the most important crop in the Pali area and during the year under report jute was grown in abundance in this area, but the price was very low. The people of this area were affected not only by the fall in the price of jute but also by the flood which damaged the aman crop in September 1930. The outturn of the aman and *bhadoi* crops in the Khiar area was affected by want of rain at certain times and excess of rain in the autumn.

2. Out of the total area of the district, *viz.*, 1,359 square miles, an area of 215 square miles, with a population of 160,974, was seriously affected in the Pali tract and an area of 103 square miles, with a population of 86,381 was affected slightly in the same tract. In the Khiar tract an area of 185 square miles, with a population of 92,856, was slightly affected. It is estimated that the aman crop in the seriously affected area was damaged to the extent of 14 annas and that the outturn of the aman and *bhadoi* crops in the slightly affected area was reduced by about one-third.

3. The duration and degree of distress were not however such as to necessitate, at any stage of the operations, the declaration of scarcity or famine under section 74 of the Bengal Famine Code. There was no shortage of food-grains. The distress was the result of the poverty to which the cultivating classes were reduced owing to the destruction of crops by floods and the low price of jute. The passing of the Sarda Act was also a contributory cause as there had been considerable expenditure on celebrating marriages shortly before the Act came into force.

4. Relief measures were promptly undertaken by Government and the district board. The main forms of relief consisted of:—

(*a*) Gratuitous relief.

(*b*) Test relief works.

(*c*) Agricultural loans.

Gratuitous relief.—Gratuitous relief was given, chiefly in the shape of cash. Doles of rice and paddy were also given. The amount spent on gratuitous relief was Rs. 1,536.

Test relief.—Test relief works consisted of the construction and repair of roads. About 37 miles of new kutcha roads were made and about 66 miles of old roads improved by employing 79,386 units at a total cost of Rs. 18,889-8. The daily average wages of each unit were As. 3-10. Government advanced Rs. 10,500 to the district board for carrying out test relief works.

Agricultural loans.—The distribution of agricultural loans began in the middle of November 1930 and lasted up to June 1931. Within this period a sum of Rs. 1,05,000 was distributed as agricultural loans, including *rabi* seeds worth Rs. 4,824.

5. The Divisional Commissioner, Mr. J. G. Drummond, inspected part of the affected tract in April 1931 and saw some members of the Hatsherpur and the Sariakandi Relief Committees. He was satisfied that the daily wages (three annas per head) paid to test relief workers on the district board road at Hatsherpur were neither too high nor too low. The Governor in Council is satisfied that the measures taken for relief of distress were successful and adequate. He desires to record his appreciation of the good work done by Rai Anath Bandhu De Bahadur, the Collector, and his staff, by the district board and by the Relief Committees.

ORDER.—Ordered that this resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

GOVERNMENT OF BENGAL.

Legislative Department.

NOTIFICATION.

No. 3157L.—27th November, 1931.—The following report of the Select Committee on the Bengal Motor Vehicles Tax Bill, 1931, with the Bill as amended by the Committee, is hereby published for general information :—

Report of the Select Committee on the Bengal Motor Vehicles Tax Bill, 1931.

We, the Select Committee to which the Bengal Motor Vehicles Tax Bill, 1931, was committed by a motion carried in the Bengal Legislative Council on the 21st July, 1931, have the honour to submit this our report together with the Bill as amended by us annexed thereto. All matter omitted by us has been printed in italics and enclosed in square brackets and all new matter has been underlined.

The Committee held five meetings, namely, on 17th, 18th, 19th and 31st August, and 1st September, 1931, and examined two witnesses. The views of the Corporation of Calcutta were ascertained and considered.

The Bill was published in English in the *Calcutta Gazette* on the 28th May, 1931.

We consider that the Bill has not been so altered as to require republication.

We recommend that the Bill as now amended be passed.

The principal changes made in the Bill with the reasons therefor are set out hereafter.

Preamble.—We have inserted the word "additional" to stress what we consider the object of the Bill to be, namely to obtain funds in addition to those already available for expenditure on roads. We have inserted two words in the opening phrase of clause 11 and have added a sub-clause to that clause to emphasise the intention of the Bill that any funds derivable from it are to be treated as an addition to available resources.

Clause 3.—Though we have made no change in this clause, considering that it was undesirable to fetter the discretion of the Local Government, we were generally of opinion that Police officers in the mufassal should not be appointed as Taxing officers.

Clause 4.—We have omitted sub-clause (*ii*) of the proviso, in the view that the concession there granted is superfluous. We have however inserted a provision on the lines of section 167 of the Calcutta Municipal Act, 1923, for remission or refund of the tax for portions of a quarterly period during which the vehicle has not been kept or used.

Clause 5.—The omission of the four words "of the total amount" makes it clear that only the last payment shall be refunded.

Clause 6.—The addition in sub-clause (*1*) has been made in view of the wording of clause 13(*b*). The addition in sub-clause (*3*) is intended to avoid interfering with the existing state of affairs in which a hire-purchaser, though not the owner of a vehicle held by him in the hire-purchase system is liable to pay the tax for the vehicle under the Calcutta Municipal Act, 1923. The hire-purchaser is now liable as the person who keeps and uses the vehicle.

Clause 8.—We consider this concession unnecessary, and have omitted the clause.

Clause 9A.—We have inserted provisions for the compulsory carrying on a vehicle of a token affording visible proof that the tax has been paid.

Clause 10.—We have altered the sum to be paid to the Corporation of Calcutta to four and a half lakhs in view of the amount shown by the latest figures available as that actually received at present by that body from the taxation of motor vehicles.

Clause 11.—Reference has already been made to our reasons for altering this clause. The explanation makes it clear that the building of a bridge without actual road construction may be undertaken out of the fund.

Clause 12.—The alterations are consequential on the new clause 9A.

Clause 13.—The clause has been revised to bring it into harmony with the wording of the new clause 13A.

Clause 13A.—This clause supplies a penalty for breaches of the provisions of the Bill not already penalized by clause 13.

The First Schedule.—We have revised the rates of taxation with a view to make the scale more regularly graduated, and in the case of the larger passenger carrying vehicles to lighten the rate of taxation.

NOTE OF DISSENT BY HON'BLE MR. B. P. SINGH ROY AND MR. C. W. GURNER, I.C.S.

With reference to clause 10 we should prefer to see some provision for periodical revision of the amount to be paid to the Calcutta Corporation after the expiry of a certain term of years.

NOTE OF DISSENT BY MESSRS. C. G. COOPER AND G. R. DAIN.

While not entirely in agreement with certain clauses of the Bill itself we have signed the report as being at best a workable compromise. We are, however, in entire disagreement with certain of the rates of taxation included in the first schedule attached to the Bill.

We do not approve of the taxation of motor cars on their seating capacity, firstly, on the ground that it is wrong in principle and, secondly, it introduces most extraordinary anomalies. To take a single instance apparently a Rolls Royce (2 seater) would pay less in taxation than a Baby Austin. We consider that taking into account the taxation proposed to be levied on lorries and omnibuses the ordinary car is let off too lightly, in view of the fact that the owner of a private car makes use of a very much larger area of the highways than the person who uses a public service.

The present charges are small compared with those levied in England and are on an entirely lower scale than those recently included in the Madras Act, No. III of 1931. It is for this reason that we advocated before the Select Committee a charge based on the over-all area occupied by a car which seems an entirely logical arrangement. We suggested Rs. 2-8 per square feet for the smaller cars occupying up to say 50 square feet and Rs. 3-8 per square feet for the larger, alternatively wheel base or chassis weight according to the manufacturer's specification.

We emphasized in Committee that every possible opportunity should be taken of endeavouring to bring about an arrangement under which the taxes, etc., paid by motor vehicles are standardised throughout India, and we consider that no motor vehicle should be subjected to more than one provincial tax in any one year.

Government accepting this view argued it was for this reason they accepted the basis of seating capacity in order to be uniform with Bihar and Orissa, but we do not consider it right that Bengal should perpetuate the wrong of Bihar and Orissa, especially as the basis of seating capacity is *not* uniform for India, Madras having adopted the basis of weight.

In regard to the charges levied on goods vehicles the basis of unladen weight was accepted by us simply as a compromise, but we consider it should be regarded as temporary as it is quite possible that it may re-act against certain motor manufacturing interests in much the same way as the horse-power tax did. Our idea is that it may tend to the introduction of a vehicle in reality too light for the hard work involved out here.

The following comparative figures speak for themselves :—

Vehicles fitted entirely with pneumatic tyres.	Annual rate of tax. Madras.	Bihar and Orissa.	Bengal. (As proposed by Select Committee.)
	Rs.	Rs.	Rs.
1½ ton Lorry (weight unladen)	500	100	175
2½ ton Lorry (weight unladen)	800	150	200
5 ton Lorry (weight unladen)	1,000	300	300
Taxi	160	75	75
20-seater Bus	800	110	55
30-seater Bus	1,200	132	105
45-seater Bus	1,800	345	180
Private car (30 cwt. weight 4-5 seater) ..	100	40	50

NOTE OF DISSENT BY MR. D. J. COHEN, M.L.C.

I sign the report subject to the following note of dissent:—

I do not agree with the recommendation of the Select Committee making the annual payment to the Calcutta Corporation a fixed annual sum. I am of opinion, having regard to the obligation of the Corporation to spend a large and an increasing amount on the maintenance and development of roads for the ever increasing number of motor vehicles, the annual payment should be revised triennially and a fair proportion of the increased income should be made over to the Corporation in addition to the payment of 4½ lakhs of rupees inserted in the Bill.

NOTE OF DISSENT BY KHAN BAHADUR MUHAMMAD ABDUL MOMIN, M.L.C.

I dissent from the majority with regard to the principle of assessment as laid down in Schedule First, Part II (Private Cars). I think an assessment on seating accommodation without considering the horse-power or value of car will tell heavily on the middle-class people who keep cars more for business than pleasure. A wealthy man who own a Rolls Royce will pay the same tax as a Ford owner.

NOTE OF DISSENT BY MR. P. N. GUHA, M.L.C.

In my opinion a grave injustice has been done to the Calcutta Corporation by fixing the annual contribution to that body to the sum of four lakhs and a half for all time to come. [*Vide* Clause 10 (*1*)]. The number of motor vehicles is increasing in Calcutta by leaps and bounds every year and it does not require any great imagination to realise that the revenue derivable from vehicles plying in the public thoroughfares under the jurisdiction of the Corporation of Calcutta will in the very near future largely exceed the sum fixed. Such excess revenue should, in all fairness, be credited to the Corporation. In this connection the fact should not be overlooked that the Calcutta Corporation is not likely to be helped out of the funds of the Road Board at any time for the upkeep of the roads under its jurisdiction. Consequently there is no justification for depriving Calcutta of the legitimate revenue that may be realised from the motor vehicles plying in its streets I hold that the question of payment to the Calcutta Corporation should be adjusted, if not every year, certainly at the end of every three years and it should be annually paid approximately the net amount realised from the motor vehicles plying in the streets of Calcutta.

CALCUTTA, *the 30th November 1931.*

B. L. SUBARWAL,
Personal Assistant to the Chief Engineer to the Government of Bengal.

Resolution on the Annual Administration Report of the Department of Industries, Bengal, for the year 1930-31.

GOVERNMENT OF BENGAL.

Department of Agriculture and Industries.

Industries.

CALCUTTA, THE 28TH NOVEMBER 1931.

RESOLUTION—No. 7004 Ind.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

Read—

The Annual Administration Report of the Department of Industries, Bengal, for the year 1930-31.

Mr. A. T. Weston held charge of the department during the year under review except for the period of his absence on leave when the charge was held by Khan Bahadur Maulvi Abdul Jalil Khan, Deputy Magistrate and Deputy Collector.

General remarks.—The scope of the Industries Department in Bengal is limited to the development of industries with particular reference to home or small scale industries and of technical and industrial education. The department is also responsible for research and investigation into the possibilities of improving the equipment for small industries and of using the natural resources of the province for industrial purposes.

Owing to financial stringency new schemes of development, ripe for effective action, had to be curtailed or abandoned whilst the work of demonstration of the results obtained in the Chemical and Engineering sections had to be rigorously restricted.

Further the economic situation caused by the world-wide trade depression, resulted in an abnormal fall in the price level of commodities attended with a shrinkage in demand. The circumstances, therefore, were far from encouraging to industrial enterprise.

Industrial Chemist's Department.—The research work in the Chemical section was mainly concerned with the utilisation of certain indigenous oils such as Punnal oil (*Calophyllum Inophyllum*), Rayna oil (*Amoora Rohituka*), Karanja oil (*Pongamia Glabra*), Kusum oil (*Schleichera Trijuga*), Neem oil (*Melia Azadirachta* or Margosa oil) and Bheranda oil (*Jatropha Curcas*) for industrial purposes. Bulletins for the use of some of the oils in soap-making, etc., have been published. Experiments were also carried out in connection with the manufacture of soap. Demonstration of soap manufacture was conducted in the Kurigram subdivision of Rangpur district and in Malda and Noakhali towns. A number of apprentices were also trained at the Industrial Research Laboratory, and it is interesting to note that some of the apprentices were enabled to take up work in soap factories.

Industrial Engineer's Department.—In this section the problem relating to the development and improvement of cottage craft and small industries engaged special attention. The main lines of work are the collection of industrial and commercial information, survey of small and cottage industries, designing and construction of labour-saving devices, demonstration of improved methods, etc. The work in this section was as elsewhere handicapped owing to want of funds; but certain experiments for the improvement of the indigenous cutlery industry and for evolving improved methods for the artificial drying of boiled paddy were carried out and satisfactory results obtained.

Bengal Tanning Institute.—In spite of the gloomy outlook of the leather trade, the low price of hides proved an incentive to small tanners and the Calcutta tanneries had a large share in the manufacture of cheap leather. The investigations carried out at the Bengal Tanning Institute and the technical knowledge in tanning processes disseminated by the Institute were of great assistance to the industry.

The training of apprentices in the modern methods of tanning at the Institute also received special attention. The effort made in the previous year to train a limited number of apprentices in the boot, shoe and leather goods trade was further consolidated. Of the first

batch of seven students who completed the course during the year, five passed the examination and two of them started business of their own.

Demonstrations of improved methods of tanning held in different parts of the province gave an incentive to a number of young men to start tanneries on a small scale.

Technical education including weaving education.—Technical education in all its branches including weaving education continued to receive attention. The Calcutta Technical School and the Kanchrapara Technical School continued to do useful work while the Central Weaving Institute at Serampore with the outlying district and peripatetic weaving schools continued to consolidate the efforts made to introduce weaving as a subsidiary industry. It is satisfactory to note that as a result of the operation of the scheme for the supply, through the agencies of demonstration parties and peripatetic weaving schools, of effective weaving appliances to the village weavers, charging them the actual cost price of the articles which are manufactured locally, six hundred and eighty appliances worth Rs. 7,692 were introduced in the various districts of the province during the year under review.

A State Technical Scholarship for a course of theoretical and practical training in waterproofing of fabrics was awarded during the year.

During the year, the Bengal State Aid to Industries Bill, the object of which is to obtain statutory power to enable State aid to be given mainly for the purpose of encouraging cottage industries and industries on a small scale, in the shape of loans, guarantees, the provision of hire-purchase system, etc., was introduced into the Legislative Council, and has since become law.

Acknowledgments.—The Government of Bengal (Ministry of Industries) have pleasure in recording their appreciation of the manner in which the work of the department was conducted by Mr. A. T. Weston, Khan Bahadur Maulvi Abdul Jalil Khan and the superior staff of the department. The Minister in charge also takes this opportunity of conveying his thanks to the members of the Advisory Board of Industries and other Boards and Committees associated with the department for the assistance rendered by them.

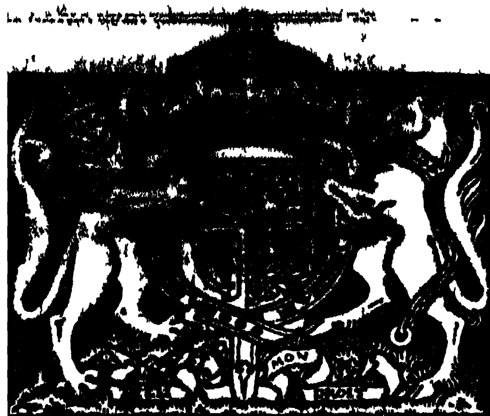

By order of the Govt. of Bengal
(Ministry of Industries),

Secy. to the Govt. of Bengal.

In addition to the details required on the previous page, information should be given below under the following heads :—

Some of the special features of the fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominee predecease them after five years of admission. The second quinquennial valuation of the Fund has been completed by the actuary to the Government of India, and his report discloses very favourable results. 17. The following restrictions shall apply to the "sale of poisons" included in Schedule I "by dispensing of prescriptions":—

(a) The stock of poisons for dispensing purposes shall be kept in the dispensing room in a separate almirah or shelf and the room or the almirah shall be locked up after dispensing hours. NOTIFICATIONS.

Minister-in-charge: The Hon'ble Mr. Bijoy Prasad Singh Roy.

No. 3000P.H.—10th December 1931.—The following proceedings of the third meeting of the sub-committee about malaria in the vicinity of Calcutta held on the 24th November 1931 are published for general information:—

Proceedings of the third meeting of the Sub-Committee about malaria in the vicinity of Calcutta held on the 24th November 1931.

1. The following members of the sub-committee were present.—

Dr. R. B. Khambata, Director of Public Health, President.

Mr. R. Senior-White, Malariologist, Bengal Nagpur Railway.

Dr. C. D. Newman, representing Chief Medical Officer, Eastern Bengal Railway.

Dr. B. N. Ghosh, Chief Medical Officer, Messrs. McLeod & Co.

Dr. K. P. Mukherji, District Health Officer, Howrah.

Dr. S. N. Nandi, District Health Officer, 24-Parganas.

Dr. P. S. Gupta, Municipal Health Officer, Budge-Budge.

Dr. L. M. Biswas, Health Officer of Calcutta Corporation, was absent.

2. The progress reports of control measures in Budge-Budge and Chengail for the months of September and October submitted by Mr. Iyengar and Dr. Sarkar were discussed. Both Mr. Senior-White and Dr. Mukherji were of opinion that the measures taken at Chengail have been satisfactory. Drs. Nandi and Gupta corroborated that the measures on the Budge-Budge side have similarly been satisfactory.

3. The committee agrees with Mr. Senior-White that in the slack season of the cold weather minor engineering schemes may be drawn up, consulting the Engineering Department, so that if carried out before the next season, permanent benefits would accrue.

4. Dr. B. N. Ghosh expressed his satisfaction at the efficacy of the anti-larval measures in the breeding places at Falta. The committee is of opinion that the number of catches of adult ludlowii mosquitoes at Majerhat has considerably decreased owing to the anti-larval measures, particularly with

paris green, taken by the Bengal Public Health Department as well as owing to measures taken by the Kalighat-Falta Railway authority.

5. The progress report of the survey for the months of September and October by Dr. B. Ghosh, Entomologist in charge, was then discussed. Dr. Newman informed for record by the committee that he had found on the 12th November one adult male A. ludlowii at Brace Bridge Railway station in the ladies' waiting room. Mr. Senior-White also reported that he caught four adult specimens—all females—three in two weeks at the Port Commissioners' storeyard near berth No. 14 and one in the Dumayne Avenue.

6. In Mr. Senior-White's opinion village Abada and Andul should be surveyed as malaria sickness has increased this year amongst the railway employees. Dr. Newman suggested that a survey should similarly be made in Jadabpur, where malaria has increased. Dr. Gupta informed that in K. P. Mandal Road in the Jaichandripur quarter of the Budge-Budge Municipality, there is increase in malaria sickness, and suggested that a similar survey should be taken up there also. He pointed out that this locality was outside the control area.

7. Dr. Nandi informed that the villages of Khasibari and Baghmari, close to the control area of Budge-Budge, were affected badly with malaria last year but not this year. The committee thinks that it is significant that the places being within half a mile from the area under control they were affected by the control measures.

8. Mr. Senior-White pointed out the importance of boat traffic on the spread of A. ludlowii further westward from the river Hooghly, and he advises that the attention of other Directors of Public Health should be drawn about the fact that there is possibility of A. ludlowii invasion further westwards by means of uncontrolled country boats.

9. Dr. Newman informed that there has been an increase of malaria in Barasat, and he undertook to make a local mosquito survey. Mr. Senior-White wanted to put on record that his assistant Dr. Adhikari had made a survey at Hooghly Point, where he could not find any A. ludlowii.

10. Dr. Sur's note, dated the 21st November 1931, on the incidence of A. ludlowii in Ulubaria and Paikpara (Sonarpur) was considered, and the committee agreed that as far as the present year is concerned the breeding has ceased, but close watch should be kept with a view to take instantaneous control measures if A. ludlowii be found subsequently.

11. The committee read and approved of the scheme submitted by Dr. Mukharji subject to the approval of the Engineers, and recommends that this should be sent to the Chairman, Howrah district board, to have a detailed scheme worked out by the District Engineer by the end of the current calendar year.

12. Dr. Khambata pointed out that, in view of the wide publicity given in newspapers on the threatened malaria menace to Calcutta, it was highly necessary for this committee to express an opinion with special reference to the invasion of A. ludlowii. The committee therefore passed the following seven resolutions unanimously, for the information of Government:—

Resolutions.

(1) There is certainly an increase of malaria in the whole of Bengal and in Calcutta this year.

(2) As far as Calcutta is concerned this committee is not in a position to say definitely to what mosquito it is due.

(3) As regards ludlowii, with which this committee is particularly concerned, recent investigations show that there is a considerable importation of this mosquito by railway trains and by country boats into Calcutta.

(4) The breeding places nearest to Calcutta so far located were last month at Falta and Ulubaria, but the committee is not in a position to state that there are no other breeding places, owing to the paucity of staff under the Director of Public Health which has prevented it from surveying many other places in the vicinity of Calcutta. But those areas so far surveyed in the vicinity of Calcutta have failed to show breeding of ludlowii.

(5) Owing to the measures of control initiated by the Bengal Public Health Department and this committee, certain other breeding areas have been sterilised.

(6) The committee feels that it has the situation in its daily changes well in hand, but that it also feels that, owing to paucity of staff and restricted powers, it has not as much information as it could wish.

(7) A mosquito survey on these lines within the area of the Calcutta Corporation itself is of the utmost and urgent necessity.

(*b*) GEOMETRY.

Class VII.

Problems.

Bisection of angles, and straight lines.
Construction of perpendiculars to straight lines.
Construction of an angle equal to a given angle.
Construction of parallels to a given straight line.

Theorems.

If two sides of a triangle are unequal the greater side has the greater angle opposite to it; and the converse.

Any two sides of a triangle are together greater than the third.

Of all straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

When a straight line cuts two other straight lines, if—

(1) a pair of alternate angles are equal, or
(2) a pair of corresponding angles are equal, or
(3) a pair of interior angles on the same side of the cutting line are together equal to two right angles,

then the straight lines are parallel; and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

Class VIII.

Problems.

Division of straight lines into any number of equal parts.
Construction of triangles and quadrilaterals with sufficient data.
Construction of a triangle equal in area to a given quadrilateral.

Theorems.

The sum of the angles of a triangle is equal to two right angles; and the two corollaries thereto.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two right-angled triangles have their hypotenuses equal and one other side of the one equal to one other side of the other, the triangles are congruent.

The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram; and the diagonals bisect one another.

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 7th December 1931.

Second Forecast of the Winter Rice Crop of Bengal, 1931-32.

(NOTE.—On an average of the five years ending 1929-30, the area under winter rice in Bengal has represented some 17·5 per cent. of the total area under rice in British India.)

Character of the season.—As reported in the first forecast, the weather was generally favourable for the preparatory tillage and for the sowing of broadcast paddy in East and North Bengal. Transplantation of winter paddy also progressed favourably. Towards the end of July high floods caused damage in the riparian tracts of East and North Bengal and temporarily checked the progress of transplantation in the affected parts. Subsequent rainfall was responsible for the large increase in area under the crop. Good rainfall in October materially helped the growth and final development of the transplanted paddy. On the whole, a good outturn is expected for the province.

Acreage.—According to the figures returned by the District Officers the total area under winter rice is 15,511,900 acres as compared with 14,900,300 and 15,120,300 acres in the corresponding and final forecasts of last year.

Outturn.—From the summary of the district returns appended it will be seen that six districts report a normal crop, nineteen districts report a crop varying from 75 to 95 and only two districts below 70 per cent. of the normal. According to the above estimates the provincial outturn works up to 86 per cent. as against 100 per cent. estimated by this department both in the corresponding and final forecasts of last year. In view of the favourable weather conditions which prevailed in October I am of opinion that the provincial outturn will not fall short of 95 per cent. of the normal.

Accepting 95 per cent. as the provincial outturn the gross yield of the crop, on the basis of a normal yield of 12½ maunds of clean grain per acre, is estimated at 6,766,700 tons this year as against 6,842,000 and 6,943,000 tons, respectively, in the corresponding and final forecasts of last year.

R. S. FINLOW,

Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 8th December 1931.

Third Forecast of the Cotton Crops of Bengal, 1931-32.

(NOTE.—On an average of the five years ending 1929-30, the area under cotton crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India.)

There are two crops, early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the season.—Continuous showers during the period of harvesting reduced the outturn of early crop in the important district of the Chittagong Hill Tracts and in the Tripura State. Elsewhere the outturn was better than last year.

The prospects of late crop, so far, are favourable.

Area sown.—The total area sown with early cotton is returned at 74,327 acres and that with late at 1,103 acres, against 76,207 and 503 acres, respectively, in the corresponding forecast of last year.

Outturn.—The outturn of the early crop is estimated at 16,608 bales and the late crop at 338 bales, against 18,380 and 101 bales, respectively, in the corresponding forecast of last year.

R. S. FINLOW,

Director of Agriculture, Bengal.

RESOLUTION--No. 7230 Co-op.

Minister-in-charge: The Hon'ble Khan Bahadur Maulvi K. G. M. Faroqui.

Read—

The Report on the working of the Co-operative Societies in the Presidency of Bengal for the year ending 30th June 1931.

Rai S. K. Ganguli Bahadur held the office of Registrar throughout the year. The Registrar has represented the necessity of strengthening the superior controlling staff of the department, but the present moment is inopportune for the consideration of such a proposal, which must await the return of normal conditions. Financial stringency has also stood in the way of strengthening the staff of Inspectors according to normal requirements, but such staff as is indispensably necessary has been provided. Government are also fulfilling their obligations in regard to the provision of additional staff required for statutory audit with the increase in the number of societies each year. The inspecting and auditing staff forms the backbone of the department, and the success of the movement largely depends on the maintenance of a high standard of efficiency of this staff. Too much stress cannot, therefore, be laid on the importance of providing for thorough and effective training of this staff in the law and principles of co-operation and in the system of audit and inspection. Government (Ministry of Agriculture) will watch with interest the working of the system of training introduced by the Registrar.

2. The co-operative movement in Bengal had to pass through a period of severe stress during the year under report. The economic situation caused by world-wide trade depression coupled with the unusual fall in commodity prices, especially of jute and paddy, which resulted in shortage of money, adversely affected the agricultural population. Distress prevailed in parts of certain districts, and measures of relief had to be undertaken. Under these circumstances not only did the credit side of the movement suffer, but the operations of non-credit agricultural and non-agricultural societies were adversely affected. This adversity was not without its lesson: it brought into prominence such defects and weaknesses of the co-operative movement as were apt to be overlooked or passed over in times of prosperity and has led to the adoption of measures for remedying them.

3. Attention is naturally drawn to the working of the rural credit societies in which the foundation of co-operative fabric lies and the soundness of which is the real test of its strength. The state of affairs revealed in the Registrar's report calls for serious attention. According to audit classification there has been a steady decline in the number of good and fairly good societies the proportion of which to the total number classified was 5·1 per cent. against 10·7 per cent. in 1925-26. The number of bad and hopeless societies, on the other hand, rose from 17·9 per cent. to 20·1 per cent. in the year under report. The bulk of the societies belonged to the average class whilst 3,408 societies were under probation. Noteworthy among the defects to which the deterioration of the rural credit movement is attributable is the faulty system of loan under which short-term capital is invested in long-term loans, and the lack of care in making loans. Neither is the normal credit of societies and of their members properly assessed or tested nor is the repaying capacity of the members based on their annual income taken into account. The inevitable result is that over-financing is followed by failure in repayment. Facile credit, on the other hand, engenders thriftlessness and encourages indebtedness and leads to the ruin of the individual borrower. There is also a regrettable lack of appreciation on the part of the directorate of the banks and societies of the imperative need of following the instructions of the department regarding the separate investment of reserve funds and maintenance of an adequate standard of fluid resources for meeting emergencies. Last but not the least is the ever-increasing accumulation of over-due loans which—aggravated as the situation has been owing to poor collections in the exceptional circumstances of the year—has risen from

24·1 per cent. in 1925-26 to 56·3 per cent. in 1930-31. It is gratifying to note that the Registrar has taken vigorous measures towards the collection of dues, and enforcement of punctuality in repayments. He has done well to institute a detailed examination of the position of the agricultural credit societies. At the present juncture the attention of the department should be directed to the work of reconstitution even at the sacrifice of numerical strength. There should be no hesitation in placing under liquidation those societies which are beyond all hope of redemption. The Government in the Ministry of Agriculture trust that the efforts of the Registrar in this direction will be attended with success and will lead to a substantial reduction in the amount of outstanding loans and result in the stabilisation of rural credit. Liquidation is indeed a long and tedious process and occupies much of the time of departmental officers, but this cannot be avoided in the present circumstances.

4. At the same time too much stress cannot be laid on the important part which should be played by the Central Banks towards the achievement of the object of securing proper business management of the primary societies affiliated to them and of improving their quality. The Registrar has rightly pointed out the mistake of taking a detached view of the working of a Central Bank without a consideration of the actual state of affairs of its member societies. While, therefore, the department is unremitting in its efforts to improve the quality of the primary societies, the Central Banks should not be failing in their obvious duty of providing for efficient supervision. The principles of sound banking require careful scrutiny of the financial position of individual societies and proper assessment of their credit, etc., before making a loan to them. The need for maintaining sufficient fluid resources and for investing the reserve funds outside their own business cannot also be overestimated.

5. As already noticed agricultural purchase, and purchase and sale societies sustained loss, while the jute sale societies which failed and became bankrupt had to be closed down and placed under liquidation. The loss sustained by them naturally had repercussions on the financial side of the movement. It is gratifying to note, however, that the recuperative strength of the movement has withstood the difficulties. A thorough enquiry was instituted in the matter, and it is hoped that it will be possible to allocate responsibility for this failure in the near future.

The failure of the jute sale societies has made it apparent that there are various difficulties which are not easy to meet successfully in the operations of purchase and sale societies. Government have, therefore, come to the conclusion that in the present circumstances anything like a widespread movement for co-operative purchase and sale is premature.

6. Great interest attaches to the movement for improving the public health and sanitation of rural areas in the Presidency. The total number of societies of this class rose from 758 to 811 and their membership from 17,014 to 17,497. Valuable work has been done by these societies by concerting measures for combating malaria and other preventible diseases within their respective areas. The inception and development of this form of co-operative effort is due to the unfailing energy of Rai Gopal Chandra Chatterji Bahadur and his fellow workers.

7. The thanks of Government (Ministry of Agriculture) are due to Rai S. K. Ganguli Bahadur for the manner in which he discharged his duties during a period of great stress and anxiety. The Minister in charge trusts that by continuance of his unfailing energy and devotion to duty Mr. Ganguli will be able to guide the movement safely through the present unfavourable conditions. He also notices with pleasure the good work done by the officers of the department mentioned by the Registrar. The unstinted co-operation received by the department from the sister departments of Agriculture, Industries and Veterinary also deserves mention.

The Minister in charge is pleased to place on record his appreciation of the valuable assistance rendered to the movement by the various district, subdivisional and other officers named by the Registrar and by all non-official gentlemen connected with it.

By order of the Govt. of Bengal

(Ministry of Agriculture),
